

ELENA Completed Project Factsheet

Gothenburg Cable Car (GCC)

Location of planned investments	Gothenburg City, Sweden
Final Beneficiary	City of Gothenburg/Göteborgs Kommun (GOT) (Company)
Final Beneficiary's address	Köpmansgatan 20 Box 2403 40316 Gothenburg Sweden
CoM signatory	Yes, signed 3 rd September 2008
Sector	Public Urban Transport
Total PDS costs	No eligible costs
ELENA contribution	None
Project development services financed by ELENA	Not applicable
Description of ELENA operation	ELENA assistance supported the City of Gothenburg in the analysis, planning, design and procurement of an urban cable car system. The cable car was to be fully integrated with the urban public transport system, to reduce travel times and offer significant transport capacity comparable to a tramway line.
Timeframe	01/01/2018– 30/09/2021
Investment programme description	None. The cable car would have been fully integrated with the urban public transport system and should have led to a reduction in travel times and to a significant transport capacity comparable to a tramway line. The updating of the total cost of operation of this project led to an increase by the factor four of the initial, estimated investment amount. Although studies to reduce costs were carried out, the cost estimates stayed high and made the City of Gothenburg with its partners to cancel this project.
Investment in implementation phase	EUR 0m
Results expected to be achieved	None
Leverage factor achieved	Zero
Lessons learnt	In view of the performance obligation required by the ELENA facility, the applicant is invited to carry out a better ex-ante analysis to ensure the feasibility of the project in terms of investment cost, and also operational costs: If no eligible investments are finally executed the ELENA grant will have to be refunded.
Further information sources	N/A
