EUROPEAN INVESTMENT BANK

COMPLAINTS

Secretary General

Dear Sirs,

Unfortunately, we are forced to turn to you, although we may need at first to turn to you but we, unfortunately for you and your participation in the present problem found out yesterday (?!).

It's about that your financial institution, 26 February 2008, received a request for a loan in the amount of 50 million euros by the European Commission for the purposes of the Public Enterprise "ELEKTROMREŽA SERBIAN" (EMS) under reference number [REDACTED] which is a funding project with your signed on 12/06/2009 with the approval of the first part in the amount of 25 million euros.

It is a project to build six electrical substations throughout Serbia in which is included the construction of a new electrical substation "BELGRADE 20" with a new electric transmission line 400 kV No. 451 "Belgrade 8 - Pancevo 2".

On that occasion, the "EMS" submitted the necessary documentation to the whole project received support and approval of the European Commission and to the whole project got your financial support. However, and unfortunately, on this occasion is "EMS" deceive the European Commission as well as the Bank because on a very shameful manner by "EMS" planted old and outdated document they copied and certified under the new dates !!!

These are as follows:

- basic planning document of this part of the project of construction of the electric substation "BELGRADE 20" as well as the accession of a electric transmission line 400 kV No. 451 "Belgrade 8 - Pancevo 2" was created back in 1987 and was made by order of the City of Belgrade,

- then it was done and complete the preliminary and final design also by order of the City of Belgrade,

On that occasion was creation of all the documents, recording the state of the field, cadastral process and everything else funded and pay directly City Belgrade but then the project is not implemented as it was not realized until now !!!

This situation has used by "EMS" and all old dokumentcaju ONLY rewrote and copied by planting the new dates and falsely portraying like a newly created document based on what you and approved present loan and where someone unlawfully took a large amount

of the same loan for allegedly creating documents that are only modified !!!

Please note that the decision of the then Government of the Republic of Serbia on determining the "public interest expropriation of land" for the construction of a electric station "BELGRADE 20" and the transmission line as a basic prerequisite for the realization of the entire project in accordance with the laws and Constitution of the Serbian which means that Serbian state subtracts land from private owners for the purpose of building the substation "BELGRADE 20" and the electric line was made 11/06/2009 and that your Bank signed a loan agreement on 12/06/2009!

So absolutely clear that everything was done in ENTIRELY synchronized !!!

Previously discussed would not be a major problem because about that knowledge have "EMS" and then the Government of Serbia but because of related period of building the electric substation and the access line is linked precisely defined clauses in the loan agreement with your bank as well as the European Commission and associated with the withdrawal of the second part of the loan of 25 million euros and what is the money on which the Government of Serbia VERY MUCH CARE and all of these is why the "EMS" and the Serbian government EXTREMELY rushing with the construction on field with extremely cheeky and VIOLENT WAY IN THIS MOMENT !!!!

However, regarding the construction on the field there is a huge problem since the documents from 1987 In no event no correspond to the actual situation on the ground in 2014 and the present situation after the past 27 years is extremely disappointing because today the route construction access lines 400 kV No. 451 "Belgrade 8 - Pancevo 2" in the suburban heritage (near Belgrade) Ritopek, Leštane and Vinca which means part of the route length of approximately 9 km have a totally different situation because:

- Transmission line route should pass on only 49 m from the largest primary school in Serbia (Primary School "Nikola Tesla" in Vinca - 2,500 students, was built in 1989 from the state of Serbia ?!)
- Route of the transmission line should pass near the largest children kindergarten in Serbia (kindergarten "Lane" in Vinca - over 400 children up to 6 years old, built in 1989 from the state of Serbia ?!)
- Transmission line route should pass directly over the roofs of more than 240 houses and other buildings, shopping centers and the like (built with the knowledge and permits and state authorities in the period from 1987 to today !!!) with example that on the the old documents should be set pylons in a private courtyard in front of the entrances to apartment buildings and the like ?!

The entire project from 1987 to 2011, he was extremely well concealed from the public so that people did not know about this ???!!!!

So today, and even while we writing this letter, "EMS" forcefully and with the assistance of Police build, regardless of the lives and health of people, especially children with very strong opposition from citizens, but ...

Vulnerable citizens through their representatives in back of 3 years in a variety of ways managed to obtain all the documents which show:

- All documents are illegal,
- All documents are outdated,

- No document correspond to the actual reality on the ground in these moment,

- **IN THE DOCUMENTS on which they build DO NOT INCLUDE AND ARE NOT INTRODUCED ENVIRONMENTAL AND THE PROTECTION OF HUMAN HEALTH and PROTECTION HEALTH OF WOMEN AND SPECIAL SHILDREN !!!**

ALL TOGETHER TERRIBLY !!!

Citizens through their representatives was run all the laws and the Constitution of Serbia prescribed procedures but with complete disregard for Serbian institutions, citizens have many times addressed to all Serbian state institutions with complete disregard including countless addressing the Government of the Republic of Serbia, the Prime Minister Mr. Aleksandar Vucic personally and even the President of the Republic of Serbia, Mr. Nikolic but with complete disregard !!!

We approached the office of the European Commission in Belgrade, the United Nations, UNICEF and etc., but to no avail !!!

Our only legal requirement is to stop construction on the old document of transmission lines to relocate for which there are very good conditions on the ground and for which there are statutory planning documents laws adopted in 2008 and 2009, which are in accordance with the laws Serbia but which in this situation is completely ignored, with the fact that our cry nobody wants to hear because "EMS" and the Government of the Republic of Serbia have no financial and do not have time and because of that they pushing everything on this terrible way to meet the requirements of your bank and to achieve a condition of development, and to take other additional of 25 million euro !!!

TERRIFYING SITUATIONS FOR OVER OF 4.000 SERBIAN CITIZENS and generations of children yet to come whose health and lives consciously sacrifice for the money which is largely already flowed into private pockets - ALL OF THIS is only one word shameful HORROR For Serbia, for all of Europe and the for all of World !!!

Since you are European financial institution who have in program to promote the protection of human rights, promoting environmental obligations, we are sure that you **CAN NOT ALLOW WITH YOUR MONEY destroyed YOUTH of SERBIAN** or any country in the world like here present violent and brazen illegal construction wich youth was sentenced to pain, suffering and disease with evident destroyed huge value **PRIVATE PROPERTY** and we are **SURE** that **YOU CAN HELP to THE innocent CITIZENS OF SERBIAN with URGENT-NOW Impact on "EMS" and the Government of the Republic of Serbia to the immediatly TERMINATION OF THIS shameful bullying ILLEGAL CONSTRUCTION of the transmission line and to find additional funds (this is a small amount!) and the time to move to another location out settlements, outside the area of school and outside the area of children's nursery, but this time everything must be done transparently with the participation of the citizens of Serbia and with the your direct supervision and the supervision of European Commission to use only fair and lawful way in which citizens willing to use their knowledge and within their capabilities directly assist and help in the implementation here proposed !!!**

Citizens are ready to provide all necessary documentation (in Serbian language) and their representatives can help and explain everything in detail because the Government of the Republic of Serbia and especially "EMS" fabricate and not telling the truth because Serbia, unfortunately, is the country in which the law does not function and **vulnerable citizens are invited you and Bank representatives to be their guests as much as needed (without knowledge "EMS") on expense of vulnerable citizens to see**

everything directly on the ground with a tour of the school, and the children's nursery, and insight into all the present but true not false documents and with the now of development of the route with direct contact and conversation with vulnerable citizens !!!

Please do not mind of our bad English language with the hope that we can understand each other and with our hope that you will understand this letter as a cry of over 4,000 vulnerable people who pray and beg you to help them for only and to just relocation of the electric transmission line 400 kV NUMBER 451 "Belgrade 8 - Pancevo 2 " in out of the settlement Ritopek, Leštane and Vinca (only about 9 km route?!) for the sake of generations and generations YOUTH SERBIAN - we do not ask any more, but we are sure not impossible, is not it?!

THANK YOU in advance for your understanding as well as your **URGENT (NOW !!!)** taken steps and what we expect to notify us immediately and we inform your that we on the same day as we inform your Bank, we informed the cabinet of the President of the European Commission, Mr. Jose Manuel Barroso,

WITH RESPECT, CORDIALLY

representative of the vulnerable groups of citizens
