

The EIB climate action commitments:

- The European Investment Bank is committed to providing more than EUR 50 billion for climate related investment across Europe and around the world over the next three years.
- At the request of our shareholders, the 28 EU member states, 25% of all lending by the EIB supports climate related investment, alongside other lending crucial for supporting economic growth and improving competitiveness in Europe.
- Expected new lending by the EIB under the European Fund for Strategic Investments initiative will also be covered by this target.
- Together with the other multilateral development banks, the EIB, as the world's largest multilateral lending institution, is working on common guidelines to track adaptation finance that will be presented in advance of COP 21 in Paris.
- To strengthen understanding of climate related investment supported by Green Bonds the EIB, the world's largest issuer of green bonds, is working with other leading Green Bond issuers on more effective reporting. This follows the EIB's pioneering role as the first institution to apply a harmonised framework for Green Bond Impact Reporting, developed in conjunction with other leading issuers and now being used to assess our Climate Awareness Bonds.
