Reference Number [IFD00000210273] our filled eligibility / Complaint of EIB elegibility procedure for Reference Number IFD000000210273 Wednesday 15 March 2017 17:56:09

Date: Attachments:

Dear Sirs

today with great frustration , we again must experience that our fund application does not get the necessary attention as required from

the importance of our first kind of demonstration project approached by this EU InnovFIN Fund .

Today we had a further discussion with this technological unqualified who never considered in his decision process

the great technological and commercial chances the EU will draw from our innovation.

We insist now on full and complete verification and commercially and technological evaluation of our High Wind kite technology from an EIB experts team not only consisting of banker

according to the directions of this InnovFIN eligibility criteria .

We additionally must emphasize that until today into our X – wind technology in total already about 5,5 Million € were invested from NTS Energy and Transportsysteme GmbH from 2009 until 2014 and various organization like IB Bank Berlin and Kfw

have already successfully funded our system to bring this demonstration unit to TRL 8 level .

We expect that this EIB team should have the power to lower the minimum equity to 0 means and consider this technology must be funded from EU via this EIB

by 100% if this team confirmed our outstanding eligibility statement and agree to the tremendous chances our technology can play to achieve the de-carbonations goals of the EU

We also hope that the EU commission and German ministry will involve and take their responsibility in this decision making process

We hope that this complaint will get immediately attention and if further assistance is requested we are always at your service

Freundliche Grüße/Kind Regards
