In 2014, the EIB continued to strengthen its role as a leading financer of sound investment projects that promote sustainable and inclusive growth, outside as well as within the EU. The 2014 Report on results outside the EU provides an overview of the results that we expect these projects to achieve and the results that have already been achieved by many projects that have reached completion.
New projects in 2014

Expected results

3,787 GWh/year new renewable energy supply, potentially serving 1.2 million households

2.6bn (32%) supporting climate change mitigation and adaptation, through 26 projects

7.9bn EUR approved for new projects in 2014

4.7bn (59%) supporting economic and social infrastructure, through 49 projects

4 million people with improved water supply or sanitation

1.7 million passengers benefiting daily from improved rail transport
Overview

Report on results outside the EU

13,000 SMEs and mid-cap companies and 23,000 microenterprises with improved access to finance, helping to sustain 450,000 jobs

3.3bn (41%) supporting access to finance for local private sector development, through 53 projects

EIB additionality

Long-term loans:

20 years on average for infrastructure

41% of projects benefiting from technical assistance

2.1bn (26%) supporting regional integration, through 26 projects

Facilitating cross-border mobility, trade, collaboration and convergence
First ex post results from credit lines approved under the ReM framework show that 105,000 jobs were sustained through loans to SMEs and mid-caps through 8 projects in Turkey, Serbia and FYROM.

A loan through the Macedonian Bank for Development Promotion helped Soko Dooel, a family-run firm in Skopje, to buy a new juice-packaging machine and expand exports to 15 European countries.
