## Activity in 1998

### *The EIB finances Europe's modernisation and sets course for the new millennium*

■ In 1998, the European Investment Bank reinforced its key position as the European Union's financing institution for setting Europe's course for the start of the millennium.

The main thrust of the EIB's EUR 30 billion in borrowing as well as in lending operations during the year was focused on preparing the way for the introduction of

the euro and on supporting capital investment to promote Europe's modernisation and growth and future enlargement. The financial basis for the Bank's continuing operations into the next millennium was secured by an increase in its capital to EUR 100 billion from 1 January 1999.

On capital markets, as part of its positive euro-strategy,

the EIB used its position as the world's largest international borrower to contribute to the successful launch of the euro by creating a large and widely diversified pool of the new currency. It issued benchmark euro-denominated and euro-tributary bonds totalling EUR 15 billion across the whole yield curve, including a euro-global issue placed simultaneously

"The sheer variety and volume of the Bank's 1998 operations highlighted its key role in promoting the economic and social welfare not only of the members of the present European Union but of the enlarged Union of the future. By our euro-directed funding activities we helped to ensure the successful launch of EMU at the end of the year; and the development of operations under the Amsterdam programme to provide risk capital for small businesses and finance investment in human capital projects contributed significantly to maintaining the momentum of the European Council's Growth and Employment initiative. Outside the Union, the Bank significantly increased its support for investment to help prepare the candidate countries in Central and Eastern Europe and Cyprus for Union membership. The Bank's important role was acknowledged in the most practical terms by the Member States when they agreed unanimously to increase the Bank's subscribed capital, thus providing a solid platform for its continuing operations into the coming millennium."

Statement by Sir Brian Unwin when presenting the results for the financial year 1998.

Sir Brian Unwin,  
President and Chairman  
of the Board of Directors

## 1998 key features:

- Lending totalled EUR 29.5 billion (+13%), of which EUR 25 billion in the EU.
- **Borrowing:** nearly EUR 31 billion (+30%) launched on capital markets in 20 different currencies.
- **Pro-active euro financial strategy:** half of borrowing in euro-denominated and euro-tributary bonds totalling EUR 15 billion; implementation of the first ever Global Commercial Paper (CP) Programme of EUR 5 billion.
- Rapid implementation of the **Amsterdam Special Action Programme (ASAP)** to support growth and employment. Since its launch in November 1997:
  - EUR 560 million equity and quasi-equity financing approved for high-growth, innovative small and medium-sized enterprises (SMEs) with job-creating potential through specialised partner financing institutions in all EU Member States
  - EUR 3 billion approved for projects in the labour-intensive "human capital" areas of education and health
  - EUR 3.8 billion approved for urban renewal.
- Continued strong support for **SMEs:** EUR 2.4 billion under traditional global loan arrangements with partner banks benefiting some 8 500 SME ventures.
- EUR 8.2 billion signed for **Trans-European Networks (TENs)** in transport, telecommunications and energy within the EU, of which EUR 3.4 billion for telecommunications. An additional EUR 1.5 billion went to schemes linking the Union with partner countries in Central and Eastern Europe. Total approved loans for TENs and linked infrastructure schemes since 1993 comes to EUR 56 billion.
- Increased lending totalling EUR 17 billion for projects in **less-advanced regions:** 72% of total finance in the EU.
- Sharp rise of lending (+60%) to EUR 2.4 billion in the applicant countries in **Central and Eastern Europe and Cyprus**, boosted by the new Pre-Accession Lending Facility.
- Doubling of lending in **ACP countries** and the **Republic of South Africa**, to EUR 700 million.
- **Major (over 60%) increase of the Bank's capital** to EUR 100 billion, lifting the lending ceiling to EUR 250 billion.

in Europe, America and Asia, as well as the first ever pure euro bond.

This year it has begun re-denomination of relevant borrowing lines into euro and by mid-1999, it will have in place a pool of euro debt of over EUR 50 billion. As the largest non-sovereign borrower in the Euro zone, the EIB expects to raise up to a further EUR 30 billion this year, of which about 60% is likely to be in euro.

The majority of the funds raised by the EIB's capital market activities were used to finance sound investment to promote modernisation and growth in the European Union and to create the basis for the successful development of EMU.

Under its Amsterdam Special Action Programme (ASAP) the Bank placed a particular emphasis in bolstering Europe's risk capital industry to support the activities of small and medium-sized enterprises, essential for Europe's future growth and employment.

Since November 1997, the EIB has approved a substantial EUR 560 million for equity or quasi-equity funding targeted at high-growth small businesses. This was in addition to EUR 2.4 billion in traditional loans during 1998 for investment by small and medium-sized enterprises, arranged through banking partners in every Member State of the Union.

Since November 1997, also under the ASAP programme, the Bank has approved EUR 3

billion for new investment in Europe's human capital in the areas of health and education, and EUR 3.8 billion for some 40 projects and programmes for urban renewal and renovation, as well as for other environmental schemes.

Outside the European Union, the Bank strengthened its support for the EU's external aid and co-operation policies. In particular, it committed loans of nearly EUR 2.4 billion in the pre-accession countries of Central and Eastern Europe

and Cyprus. This amount, boosted by the introduction in January 1998 of the Bank's new Pre-Accession Lending Facility, made the EIB the largest single source of international loan finance in these countries.

## Borrowing

### Euro strategy

The EIB's strong performance on the international capital markets in 1998 was focused on its **pro-active euro-strategy**, aimed at speeding up the early creation of a liquid and widely diversified euro market, prior to the start of EMU.

This reinforced the Bank's policy, launched in 1997, to issue euro-denominated and euro-tributary bonds allowing the market to develop a future yield curve for the euro.

In 1998, it launched a range of euro and euro-tributary issues, equivalent to EUR 15 billion, including Euro-zone (EU-11) currencies DEM, FRF, ITL, ESP and PTE and "pre-in" currencies GBP and GRD. These operations added to the EUR 6 billion euro-related bonds issued in 1997, bringing **total euro-related issues to EUR 21 billion**, with maturities ranging from 5 to 30 years.

Other 1998 borrowing highlights included the launch of a

EUR 2 billion *first EIB euro global issue* in February, placed simultaneously on the European, American and Asian markets, and the *first-ever pure euro issue*, for EUR 1 billion, in December, with a payment date of 7 January 1999. This issue was the first fixed-income transaction in which all cash flows were to be settled in euro.

The Bank issued the first-ever EUR 5 billion **Global Commer-**

cial Paper (CP) Programme replacing all its CP programmes in ECU, GBP, ITL, NLG, and USD, and providing it with access to the widest possible investor base.

### *Redenomination of debt*

The EIB's pro-active euro strategy is aimed at the creation of a **critical mass of outstanding debt in euro**. Since 1 January 1999, the Bank has implemented a redenomination scheme for its existing EU-11 debt, while ECU debt automatically has already been converted into euro.

The Bank is also converting its tributary-debt for euro-debt at the three first redenomination

dates in 1999. In June 1998, it launched a Euro Debt Exchange Offer enabling its bondholders, from time to time, to exchange bonds in EU-11 currencies into euro or euro-tributary issues. These operations will provide the Bank by mid-1999 with a debt pool in euro in excess of EUR 50 billion, which would mean that its objective to create a critical mass of outstanding debt in euro would be achieved.

### *Supporting the new capital markets in Central and Eastern Europe*

The EIB has stepped up its presence on capital markets in the region, launching bond issues

on Euro-markets in Czech koruny, Estonian kroon and DEM-indexed synthetic Polish Zloty to channel international and domestic savings into local productive investment projects and to encourage the growth and internationalisation of the region's capital markets.

It has also placed its first AAA-rated bonds in the Hungarian domestic market with a Hungarian Forint Debt Issuance Programme of HUF 20 billion (some EUR 100 million) and intends to launch similar programmes in other applicant countries. The Bank has played a similar role in developing domestic capital markets in new EU Member States, for instance in Greece, Spain and Portugal.

## Lending in the European Union

*The special SME window offers risk capital facilities for innovative SMEs with growth and job-creating potential*

With total lending in the European Union of EUR 25 billion, 1998 saw a rapid implementation of new financing facilities benefiting projects in support of growth and employment and human capital-related investment. At the same time, the Bank sustained the high lending volumes of its "traditional" core activities furthering EU policy objectives with a top priority for regional development.

### *Amsterdam Special Action Programme (ASAP)*

Launched in November 1997 as the Bank's response to the June 1997 Amsterdam Summit's Resolution on Growth and Employment, ASAP has become a key EIB activity. Its three main components are: a special SME Window for risk capital facilities for innovative SMEs with growth and job-creating poten-

tial; extension of lending into the "human capital" sectors of education, health, and urban renewal; and, stepping up financing for Trans-European Networks (TENs) and the environment.

### *Small and medium-sized enterprises*

A key target for EIB financing, both through traditional global loan arrangements and the ASAP SME Window. Under the SME Window since November 1997, the EIB has approved EUR 560 million for 23 equity and quasi-equity operations in 12 Member States, with operations under preparation in the other 3. This also included the **European Technology Facility (ETF)**, a new EUR 125 million instrument managed by the Bank's affiliate, the European Investment Fund (EIF), to support venture capital funds. 16 operations for EUR 62 million have been approved under the ETF. The EIB and the EIF are co-operating with specialised financing institutions throughout the Union as catalysts to provide a new impetus to the EU's risk capital markets. Risk-sharing operations under the Window are backed with up to EUR 1 billion set aside from the EIB's surpluses.

In 1998, allocations from global loans benefiting SMEs amounted to over EUR 2.4 billion, involving 8 500 SME ventures.

### *Education, health and urban renewal*

Under ASAP, the Bank has begun to be active for the first time in the **sectors of educa-**

**tion and health.** It has so far, since November 1997, approved EUR 3 billion for 24 operations in these areas, also benefiting smaller schemes under dedicated global loans in Belgium, Denmark, France, the Netherlands, and Finland. At end-1998, the Bank had approved financing totalling EUR 3.8 billion for 23 **urban renewal** projects or programmes located in 9 countries.

### *Regional development*

The Bank increased its lending in assisted areas to EUR 17 billion – accounting for 72% of total lending within the Union – in keeping with its prime task to enhance the Union's balanced social and economic integration. EIB loans contributed to about 5% of new capital investment on average in the EU as a whole, while amounts in the Cohesion Countries of Greece, Spain, and Portugal were markedly higher, amounting globally to 9%.

### *Trans-European networks*

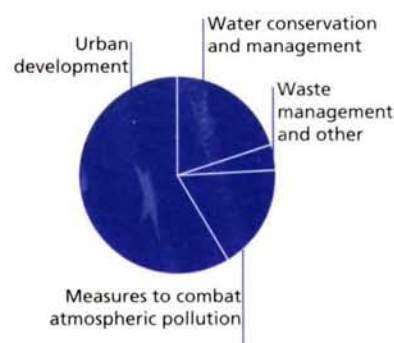

The EIB remained a leading provider of finance for **Trans-European networks (TENs)** in transport, telecommunications and energy transmission, lending EUR 8.2 billion for TENs within the EU and another EUR 1.5 billion for links with candidate countries in Central and Eastern Europe. 1998 saw an increase to EUR 3.4 billion signed for telecommunications networks (both mobile and conventional); while EUR 4.4 billion went to transport projects, including EUR 1 billion for priority TENs (see below); and

6 165

**Energy objectives**  
2 343

**Industrial competitiveness**  
4 024

EUR 400 million for energy networks, of which a quarter for priority TENs.

Since 1993, the Bank has approved loans for TENs and associated projects totalling EUR 56 billion, of which EUR 50 billion within the EU, representing aggregate investment of more than EUR 160 billion. Approvals for **priority TENs** in transport and energy transfer, as defined by the Essen European Council in December 1994, total EUR 12 billion for nine out of fourteen transport projects, and EUR 2.5 billion for seven out of ten energy schemes.

Besides, loans signed in support of priority *transport corridors* and telecom and energy net-

works in applicant countries in Central Europe came to EUR 3.3 billion, of which EUR 1.5 billion approved for *transport corridors* in 1998.

In the Mediterranean region, EUR 940 million were made available for a gas pipeline bringing gas from Algeria through Morocco to the Union's grids.

### *Public-Private Partnerships (PPPs)*

In 1998, the Bank continued providing tailor-made financing under its special TENs Window to meet the requirements of PPPs, for instance the Athens International Airport Spata, the Great Belt link in Denmark, the

Öresund link between Denmark and Sweden, the Channel Tunnel Rail Link (CTRL) and the London Underground in the United Kingdom, and the Belgian section of the PBKAL high-speed rail network. In the education sector, the EIB co-financed the Falkirk School PFI project in Scotland.

As the EU's financing institution, the Bank also operates as a catalyst attracting other sources of bank financing, often in association with other forms of EU funds, in particular grant finance from the Union's structural funds and the TENs budget line of the European Commission, as well as guarantees from the European Investment Fund.

## Lending in applicant countries

1998 was the first year of implementation of the Pre-Accession Lending Facility, which along with existing financing mandates brought a sharp increase in EIB lending in the applicant countries of Central and Eastern Europe and Cyprus, to EUR 2.4 billion.

### *Central and Eastern Europe*

Loans totalling EUR 2.3 billion (+60%) were made available in

the ten applicant countries under the Bank's EUR 3.5 billion lending mandate and an EUR 3.5 billion Pre-Accession Facility (launched in January 1998), both running to the year 2000.

The Bank's loans were made in direct support of the objectives in the Pre-Accession Partnership Agreements. The investment financed focused on economic integration, both with the EU and within the region, and on

**Financing in applicant countries in 1998**

support for the adoption of the EU's rules, regulations and standards (*acquis communautaire*), with particular emphasis on environmental protection. EUR 1.7 billion out of total EUR 2.3 billion finance went to transport schemes such as the modernisation of railway lines in Hungary, Lithuania, and Romania, road improvements in Bulgaria, Lithuania, Poland, the Czech Republic, Romania and Slovenia and urban transport projects in Budapest, Krakow and Katowice. The Bank is the largest source of loan finance in the region, increasingly operating in co-operation with grant aid from the EU's Phare programme and with other multilateral financing institutions such as the EBRD.

### Cyprus

EUR 80 million were advanced, of which EUR 50 million global loan finance under the Pre-

Accession-Lending Facility benefiting SMEs in the industrial, agro-industrial, tourism and service sectors.

*In 1998, the EIB launched the Pre-Accession Facility*

## Lending in other partner countries

The EIB's lending outside the European Union, underpinning the Union's financial aid and co-operation policies with some 100 countries throughout the world, amounted to EUR 2.0 billion, including EUR 360 million for operations using risk capital from EU or Member States' budgetary resources.

### *Mediterranean region*

Lending amounted to nearly EUR 1 billion. Key areas of activity were water supply,

energy, environment and the private sector.

In line with the Euro-Med Partnership's target to help the private sector to restructure and expand in preparation of the gradual establishment of a free trade zone with the EU Member States by the year 2010, the EIB advanced EUR 250 million for the development of the private sector, including projects in Gaza/West Bank, Egypt, Jordan, Morocco, and Tunisia, many of these with involvement of the local financial sector.

### *African, Caribbean and Pacific (ACP) Countries and South Africa*

Lending in these countries more than doubled to EUR 700 million, including EUR 135 million in South Africa. This sharp increase was mainly due to the entry into force of the Lomé IV Second Financial Protocol as from 1 June 1998 (almost all of the loans were signed after this date).

The protocol, which extends to the year 2000, enables the EIB to provide EUR 1.7 billion from

its own resources and another EUR 1 billion from budgetary risk capital resources from the European Development Fund. In 1998, the Bank reinforced its support for development of the private sector with EUR 100 million going to both large and smaller business ventures.

### Asia and Latin America

Loans totalled over EUR 360 million of which EUR 210 million in Latin America. The Bank's lending in both regions is aimed at projects involving technology transfer; joint ventures between companies from the regions and the EU; telecommunications and trans-

port; regional integration; and environmental protection.

The EIB participated in the emergency relief efforts of the international community after Hurricane Mitch had swept through **Honduras** and **Nicaragua**. The Bank's donations will benefit projects and actions in the social sphere, such as an orphanage and hospitals.

### Albania, Former Yugoslav Republic of Macedonia

The Bank continued its lending in **Albania**, which totalled EUR 22 million in 1998. Since 1 January 1998, it has operated in **FYR Macedonia**, under a two-year lending mandate of

Financing in other partner countries in 1998

EUR 150 million for rail, road and other infrastructure projects, advancing its first loan in July for two key motorway sections.

## Capital increase

The EIB's Board of Governors increased the Bank's subscribed capital from EUR 62 billion to EUR 100 billion as from 1 January 1999. This 62% increase raised the statutory ceiling on EIB lending to EUR 250 billion (250% of subscribed capital), providing sufficient headroom for lending for at least the next five years.

The paid-in capital was set at 6% (EUR 6 billion) of the subscribed capital, entirely funded through a transfer from the Bank's accrued reserves, not requiring any cash demand

from the owners, the EU's Member States. ■

Breakdown of subscribed capital 100 billion

# Lending within the European Union

**Financing provided** for capital investment within the European Union in 1998 totalled 25 116 million, as against 22 887 million in 1997, representing an increase of 9.4% (see detailed breakdown, table below).

The corresponding operations were financed from own resources – made up chiefly of the proceeds of the EIB's capital market borrowings as well as its own funds (paid-in capital and reserves) – totalling 25 101 million. In addition, a 15 million guarantee operation was mounted in the United Kingdom. These operations give rise to financial commitments for the Bank and are accounted for in its balance sheet.

The EIB cooperates closely with a large number of financial institutions and commercial banks, with which it concludes global loans for financing small and medium-scale projects in the industrial, service, health, education and infrastructural sectors. It also grants individual loans through the intermediary of banks and institutions.

## Germany

Finance contracts signed: 5 168 million  
(1997: 3 447 million)

Individual loans: 2 796 million  
Global loans: 2 372 million

**Individual loans** within Germany as a whole were granted for the energy sector (187 million), transport (420 million), telecommunications (623 million), water and solid waste management (331 million) and urban development (608 million). Loans in support of projects in industry – including development of an industrial estate – and the service sector totalled 156 million and 57 million respectively. Schemes in the health and education sectors attracted 412 million.

**Individual loans** to assist projects in Germany's eastern Länder accounted for 48% of the total in 1998. Among these, particular mention should be made of urban renewal schemes in Berlin: upgrading of the natural gas supply network, development of the Potsdamer Platz and Adlershof area, extension of premises and modernisation of the trade fair, and renovation of hospital buildings. In addition, financing was provided for fixed and mobile telephony networks (623 million) in the eastern Länder and throughout the country.

The Thameslink 2000 project, financed in 1997, includes the construction of a new railway station

# Lending outside the European Union

Outside the European Union, the areas covered by Bank activity can be subdivided into two categories:

- **Countries which have applied for accession to the European Union:**  
Hungary, Poland, Slovak Republic, Czech Republic, Bulgaria, Romania, Estonia, Latvia, Lithuania, Slovenia and Cyprus
- **Other Partner Countries:**
  - African, Caribbean, Pacific States; Overseas Countries and Territories
  - South Africa
  - Mediterranean Countries (excluding Cyprus)
  - Central and Eastern European Countries (Albania, FYROM)
  - Latin America
  - Asia

## Financing provided in 1998 (EUR million)

	Total	Own resources	Risk capital*
<b>Applicant Countries</b>	<b>2 375</b>	<b>2 375</b>	
Central and Eastern European Countries (of which Pre-Accession Facility)	2 295 (1 320)	2 295 (1 320)	
Cyprus (of which Pre-Accession Facility)	80 (50)	80 (50)

# The new EIB logo

Since its creation in 1958 under the Treaty of Rome, the European Investment Bank (EIB) has established itself as a world leader among multi-lateral financial institutions and non-sovereign borrowers. So as to reflect more closely its specific role as the European Union's financing institution, the EIB has

Bank's solidity and stability, without being aggressive or commercial.

Adoption of the new logo represents a response to the profound changes witnessed by the EIB over the past ten years in terms of its borrowing and lending facilities, the increased sophistication of its

European integration, underpinned by the Bank. Nor did it convey the EIB's present values: long-term financing, solidity and partnership.

The logo is composed of three vertical elements tracing the form of a square. The central element is "European blue" in colour: it represents the "project of European integration" and echoes the main symbol of the European Union. The side elements are grey, the dominant colour of the Bank's building; they surround and protect the central element.

The square is the shape generally adopted for bank logos, and therefore underscores the specific role of the EIB among the European institutions and its ties with the financial community. However, in contrast to most symbols in the banking world, the square formed by the new logo is neither complete, closed nor totally symmetrical. This open quality reflects the process of European integration, the very reason for the Bank's existence: while the symbol is irreversible and robust, it is also receptive to the outside world. The logo is now being displayed in conjunction with the Bank's name and there is a version of it in each of the Union's official languages. The new EIB logo is protected by legal registration, notably with the WIPO (World Intellectual Property Organization). ■

decided to modify its visual identity and logo with effect from 1 March 1999, a defining year for EMU with the successful launch of the single currency and over forty years since the EIB commenced its activity in support of the Union's objectives.

The new EIB logo is intended to embody the idea that the Bank is investing in Europe's future, nurturing the European Union's objectives. It also seeks to stress the concept of partnership, one of the key elements of the EIB's *modus operandi*: investment carried out in the interests of European integration with the support of the EIB and other institutions, whether these be EU organisations or members of Europe's banking community. Visually, the logo is designed to highlight the

operations and its ever growing partnership with both the banking community and EU institutions. These developments give practical expression to the new remit entrusted to the Bank by the European Union (notably supporting successful introduction of the euro, fostering growth and employment in Europe, assisting applicant states, etc.), which have raised its profile among the European public.

The new EIB logo replaces the previous design dating back to 1963 and based on a map of Europe. Although modified in 1974, 1980, 1981, 1986, 1990 and 1995 in conjunction, *inter alia*, with successive enlargements of the Union, the 1963 logo gave no sense of the scale and constant expansion of the project of
