

European Investment Bank

European Union

Loans concluded for capital investment within the European Union in 2004 totalled 39 661 million (see detailed breakdown in table below).

The corresponding operations were financed from own resources – made up chiefly of the proceeds of the EIB's capital market borrowings as well as its own funds (paid-in capital and reserves). These operations give rise to financial commitments for the Bank and are accounted for in its balance sheet.

The EIB cooperates closely with a large number of financial institutions and commercial banks, with which it concludes global loans for financing small and medium-scale projects in the industrial, services, health, education and infrastructure sectors. It also grants individual loans through the intermediary of banks and financial institutions.

In the following lists, the Community policy objectives with which individual loans comply are highlighted by symbols in the right-hand column. These symbols are as follows:

- + regional development
- ♦ human capital
- 0 European communications infrastructure
- * environment and quality of life
- x energy
- = Innovation 2010 Initiative

Unless otherwise indicated, global loans cover a number of sectors and objectives.

Amounts relating to projects appearing in these lists are expressed in EUR millions.

As round figures are used, it is possible that the totals do not correspond to the sum of the individual amounts.
