- **Rudolf Niessler**, Director, Policy Coordination, DG Regio, European Commission
- **Richard Pelly**, Chief Executive, European Investment Fund

#### Closing remarks

- **Matthias Kollatz-Ahnen**, Vice-President, European Investment Bank

### 17:00

End of conference programme

### What is JASPERS ?

The JASPERS (Joint Assistance to Support Projects in European RegionS) programme is a technical assistance partnership between the European Commission's Regional Policy DG, the European Investment Bank (EIB) and the European Bank for Reconstruction and Development (EBRD) and the KfW which recently joined the Partnership.

The main objective of this programme is to provide technical expertise to the Member States with a view to developing large-scale high-quality infrastructure projects, mainly in the transport and environmental sectors, with the help of EIB and EBRD experts, thus expecting the grant funding that they may obtain from the Commission.

### What is JEREMIE ?

JEREMIE stands for "Joint European Resources for Small and Medium-sized Enterprises" and is an initiative which was developed by the European Commission (EC) and the European Investment Fund (EIF), which is part of the European Investment Bank (EIB) group in the context of the EU Structural Funds allocation 2007-2013 for the European Member States and regions.

The initiative offers EU Member States, through their national or regional Managing Authorities, the opportunity to use part of their European Union (EU) Structural Funds to finance small and medium-sized enterprises (SMEs) by means of equity, loans, or guarantees, through a revolving Holding Fund acting as an umbrella fund.

### What is JESSICA ?

JESSICA stands for Joint European Support for Sustainable Investment in City Areas. This initiative is being developed by the European Commission and the European Investment Bank (EIB), in collaboration with the Council of Europe Development Bank (CEB). Under new procedures, Member States are being given the option of using some of their EU grant funding, their so-called Structural Funds, to make repayable investments in projects forming part of an integrated plan for sustainable urban development. These investments, which may take the form of equity, loans and/or guarantees, are delivered to projects via Urban Development Funds and, if required, Holding Funds.
