from 1990 to 2022

February 2023

European  
Investment Bank

Public-private partnerships  
financed by the European Investment Bank  
from 1990 to 2022

February 2023

## Terms of Use of this Publication

The European PPP Expertise Centre (EPEC) is part of the Advisory Services of the European Investment Bank (EIB). It is an initiative that also involves the European Commission, Member States of the EU, Candidate States and certain other States. For more information about EPEC and its membership, please visit [www.eib.org/epec](http://www.eib.org/epec).

The findings, analyses, interpretations and conclusions contained in this publication do not necessarily reflect the views or policies of the EIB or any other EPEC member. No EPEC member, including the EIB, accepts any responsibility for the accuracy of the information contained in this publication or any liability for any consequences arising from its use. Reliance on the information provided in this publication is therefore at the sole risk of the user.

EPEC authorises the users of this publication to access, download, display, reproduce and print its content subject to the following conditions: (i) when using the content of this document, users should attribute the source of the material and (ii) under no circumstances should there be commercial exploitation of this document or its content.

## Purpose and Methodology

This report is part of EPEC's work on monitoring developments in the public-private partnership (PPP) market. It is intended to provide an overview of the role played by the EIB in financing PPP projects inside and outside of Europe since 1990.

This report covers a wide range of PPP transactions (e.g. design-build-finance-operate, design-build-finance-maintain, concession arrangements which feature a construction element, the provision of a public service and risk sharing between the public and private sector, and can include regulated assets), regardless of the type of financing provided by the EIB (e.g. project finance, sovereign lending). Portfolio loans to small PPP projects and investments in equity PPP funds are not listed in this report.

The term "amount" represents the lending commitment of the EIB at the date of signature of the main loan contract. In some cases, this amount is the aggregate of a series of loan contracts for the same project. The commitment amounts may differ from the actual amounts disbursed. EPEC continues to review project data and update historic information on an ongoing basis and incorporates any identified changes in this annual update.

Project data contained in this publication may be subject to future revisions due to the late availability of information or corrections to previously reported values.
