ABOUT THE REPORT

In a year shaped by geopolitical uncertainty and economic headwinds, the European Investment Bank Group reaffirmed its commitment to supporting Europe's priorities through targeted investment. The **2024 EIB Group Lending Report** provides a detailed overview of how the Bank delivered on EU policy goals – financing projects that accelerate the green transition and enhance energy security, and funding innovation and sustainable growth across the European Union and beyond.

In 2024, the EIB Group signed €88.8 billion in new financing, backing high-impact investments in sectors such as climate action, clean energy, digitalisation, security and defence, and healthcare. This lending mobilised around €350 billion in total investment in projects that support Europe's strategic goals.

Nearly 60% of all financing supported the green transition and environmental sustainability. That financing mobilised a record €100 billion in investment for energy security projects across the European Union, strengthening Europe's power grids, increasing renewable energy capacity and reducing emissions.

This report offers a comprehensive country-by-country breakdown of signed operations across all EU countries and provides a five-year overview of investments per sector. It also outlines the Bank's activity outside the European Union – €8.4 billion in signed financing for sustainable development that will improve the resilience of countries beyond Europe's borders.

The European Investment Fund, the part of the EIB Group that funds smaller businesses and innovation, signed €14.4 billion in new operations, including €7.2 billion in equity investments – a record level of support for higher-risk ventures.

The **2024 EIB Group Lending Report** is a snapshot of the Group's performance and a roadmap of its growing role in Europe's future. It shows how the EIB Group is adapting to emerging challenges with bold, strategic investment – and how, even in uncertain times, it continues to deliver for people, businesses and the planet.

Note:

Amounts are expressed in € million.

To record statistics on its financing operations (contract signatures and disbursements), the EIB uses the conversion rates obtained on the day of the operation.

As round figures are used, it is possible that the totals do not correspond to the sum of the individual amounts.

The new public policy goals were presented in the Operational Plan 2021. In the list of operations within the European Union, the right-hand column shows the public policy goals that each project aligns with:

- Sustainable cities and regions (SC-R)
- Sustainable energy and natural resources (SE-NR)
- Innovation, digital and human capital (INNOV-D-HC)
- SME and mid-cap finance (SME)

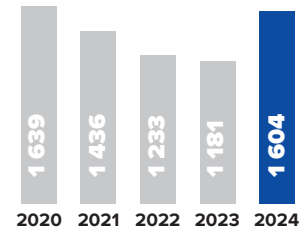

Cross-cutting indicators

- Economic and social cohesion (ESC)
- Climate action and environmental sustainability (CA-ES)
