InnovFin Infectious Diseases

Supporting the fight against infectious diseases

With **InnovFin Infectious Diseases**, the European Investment Bank funds innovators to develop vaccines, drugs, medical and diagnostic devices, and research infrastructure for combatting infectious diseases.

EUR
7.5 -75
million

IDFF provides financial products ranging from standard debt to equity-type financing for amounts typically between **EUR 7.5 and 75 million**.

Making biologics available and affordable to all!

Univercells aims at increasing the availability of affordable vaccines and biotherapeutics to address global health challenges.

Our technology focuses on significantly reducing the infrastructure required for the production of biologics while simplifying and automating operations, fostering their dissemination at an affordable price.
