## Environmental and Social Completion Sheet (ESCS)

### Overview

Project Name:	PETLIM PORT
Project Number:	2014-0377
Country:	Turkey
Project Description:	The project consisted of the redevelopment of existing port facilities at the port of Petkim to provide a 1.3 million TEU container terminal. The facilities are located within the Port of Aliaga, which is to the north of Izmir on the Aegean coast of Turkey.

### Summary of Environmental and Social Assessment at Completion

#### EIB notes the following key Environmental and Social outcomes at Project Completion:

Works consisted of the demolition, replacement and extension of quay structures, dredging to deepen port access, reclamation and construction of container yard, construction of a breakwater and removal of existing breakwater, building, road construction. Construction started in 2013 with completion in 2018.

The project was the subject of two full environmental and social impact assessments (ESIA). The first was undertaken in 2011 in accordance with the Turkish Environmental Law No. 2872, which at the time, was in the process of being harmonised with the appropriate EU directives as part of the nation's pre-accession preparation. A second ESIA was undertaken in 2012 in accordance with the requirements of the International Finance Corporation (IFC) Performance Standards on Environmental and Social Sustainability (2012 version).

An Environmental and Social Management Plan (ESMP) was prepared at the time of project preparation in compliance with all applicable Turkish legislation as well as Equator Principles and relevant IFC guidelines. The ESMP implemented internationally recognised best management/industry practices and best available techniques to minimise the potential environmental and social impacts identified by the ESIA during the construction, operation and closure phases.

As required by the applicable Law, the Promoter has monitored the project's compliance with the different measures set forth by the approved ESIA and it has reported on quarterly basis to the environmental Competent Authorities in Turkey on this subject. According to the Promoter, at the time of producing this document, the Competent Authority has not provided any comments on the submitted reports.

No major environmental or social issues related to the implementation or operation of this project have been noted by the Bank's Services.

#### Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion, based on reports from the Promoter during and following construction, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
