

European Investment Bank (EIB)

Luxembourg, 05.12.2019

Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	Vidrala Advanced Glass Manufacturing
Project Number:	2016-0282
Country:	Italy
Project Description:	The project comprises investment in innovative manufacturing technologies to completely rebuild one of the promoter's production sites and transform it into a smart glass factory in the period 2016 to 2018

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

No significant environment or social issues were noted.

The promoter has shared with the Bank the relevant documents provided and published during the process of renewal of the Autorizzazione Integrata Ambientale (AIA permit). Based on the information provided by the Promoter, the Competent Authority has decided to screen out the project and did not request a full EIA report.

The project was implemented according to schedule and is operating in full compliance with Best Available Techniques. The promoter has implemented the project in accordance with all mitigating measures described in the environmental authorisation (AIA permit). The promoter did not report on any adverse environmental effects.

In addition the project generated 17 new FTEs, contributed to preserving about 183 existing direct jobs and supported an intensive training, due to the introduction of state of the art technology, which resulted in an upskilling of the workforce.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
