## Environmental and Social Completion Sheet (ESCS)

### Overview

Project Name: **ATLAS COPCO RDI III**

Project Number: 2014-0197

Country: Sweden

Project Description *RDI investments over the 2015-2018 period, for advanced research and development of technologies as well as new innovative products in the areas of Compressors, Mining and Rock Excavation and Industrial tools.*

### Summary of Environmental and Social Assessment at Completion

**EIB notes the following key Environmental and Social outcomes at Project Completion.**

The project concerned investments in advanced research and development of technologies as well as new innovative products in the areas of Compressor Technique, Industrial technique and Mining and Rock Excavation Technique. The activities were carried-out in authorised existing facilities.

The promoter's RDI activities were mainly driven by the need to develop enhanced industrial tools and equipment, allowing customers to increase the levels of productivity, energy efficiency, safety and ergonomics, as well as to reduce the environmental impact of the production processes.

No significant environment or social issues were noted. Overall, the project had been assessed as acceptable.

### Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
