Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	Uniklinikum Homburg
Project Number:	20100213
Country:	Germany
Project Description:	Construction of a new building for internal medicine as part of Saarland's University Hospital long-term investment programme.

Summary of Environmental and Social Assessment at Completion

The actual project concerns the extension of an existing hospital to replace about 16 outdated buildings no longer suitable for the provision of modern medical service. The four new buildings have been erected on the existing campus close to and connected with already existing buildings. No significant environment or social issues were noted during the planning process and the actual implementation.

Overall, the rehabilitation and extension of the outdated facilities has significantly improved hygiene and safety conditions. The modernised buildings and the consolidation of the services on a reduced footprint will increase the overall energy efficiency.

Overall, the creation of new state-of-the-art facilities has improved hygiene and safety conditions.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
