Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	ADMINISTRATIVE & URBAN INFRASTRUCTURE (ECUADOR)
Project Number:	20130528
Country:	ECUADOR
Project Description:	Construction/adaptation of public administrative buildings and associated government infrastructure for social and economic activities

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

No significant environment or social issues were noted. The promoter has implemented an Environmental and Social Action Management Plan with monitoring reports along the implementation. Due to the implementation of the project in an urban context, there were no major environmental and social risks.

EIB notes the following key Environmental and Social aspects to be monitored during operations:

Real energy consumption of the building. Positive impact of the commissioning of the metro. Results of the studies on cost-benefit analysis, sustainability, management and impacts of the new Platform (financed by IADB, expected in 2021).

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter and inputs provided by Supervisors during Construction (in particular reports on the implementation of the Environmental and Social Action Management Plan, reports on air quality and noise) that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
