Environmental and Social Completion Sheet (ESCS)

Overview

| | |
|----------------------|---|
| Project Name: | MIROVA EUROFIDEME 3 CO-INVESTMENT WIND SWEDEN |
| Project Number: | 2015-0567 |
| Country: | Sweden |
| Project Description: | Co-investment of an onshore wind farm in Sweden |

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

No significant environment or social issues were noted.

A comprehensive EIA has been conducted. The project area is not located close to any Natura 2000 site. Due to the presence of nesting birds in three small protected areas and bird migratory paths the project has been adapted to take into account these points, including a restriction of the construction period. The project generates positive environmental impacts, notably by reducing GHG emissions.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion, based on reports from the promoter and the fund manager during construction, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
