## Environmental and Social Completion Sheet (ESCS)

### Overview

Project Name: Fuel Efficiency RDI  
Project Number: 2016-0027  
Country: Germany  
Project Description: The project concerns the promoter's fuel efficiency related activities in the development of transmission systems and powertrain modules for passenger cars and commercial vehicles. In addition, it concerns investments in electro mobility related R&D activities

### Summary of Environmental and Social Assessment at Completion

**EIB notes the following key Environmental and Social outcomes at Project Completion.**

No significant environment or social issues were noted. The project concerned selected activities across four of the promoter's six divisions that have as primary objective the improvement of fuel efficiency of the vehicles that the final products will be deployed in. Over the project period, the promoter increased its focus on electro mobility activities that are expected to have positive impact in the decarbonisation of the transport sector.

### Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
