Environmental and Social Completion Sheet (ESCS)¹

Overview

Project Name:	Primary Care Centres
Project Number:	20140692
Country:	Ireland
Project Description:	The Project comprised the design, build, finance, maintenance and facilities management of 14 Primary Care Centres (PCCs) on greenfield and brownfield locations owned by the Government of Ireland in the four main Health Service Executive (HSE) regions of Ireland.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The facilities were built on greenfield and brownfield locations with no high ecological value. The project therefore has not experienced any significant environmental and social risks and the competent local authorities did not require an EIA Report or an Appropriate Assessment for any of the 14 PPCs.

The construction and operation of the new 14 PCCs has helped facilitate the delivery of accessible, high quality integrated primary care services aimed at improving the health and well-being of the local population.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter, site visits by the EIB team and inputs provided by Lenders' Supervisors and others during Construction that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
