Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	Stadtentwicklung Brandenburg III
Project Number:	2014-0125
Country:	Germany
Project Description:	The Project comprises small and medium-scale investment schemes in the areas of urban infrastructure, cultural heritage/historic monuments, public buildings and some social housing in the Land Brandenburg.

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

The Project represents a framework loan dedicated to a portfolio of sub-projects concerning improvement, downsizing and (re-)construction in the areas of urban infrastructure, cultural heritage/historic monuments, public buildings and some social housing, located within urban renewal and development areas, implemented by local authorities in the Land Brandenburg in the period 2014-2018.

The Promoter was not to commit any EIB funds against sub-projects that require a full EIA or biodiversity assessment according to EU and national law without, prior to commitment, receiving the consent from the competent authority, and the Non-Technical Summary of the EIA having been made available to the public.

According to the Promoter, none of the schemes allocated was subject to a full EIA. Furthermore, none of the schemes included in the Project was located in the vicinity or had impacts on Protected areas, including Natura 2000 sites.

Overall, based on the Promoter's reporting, the requested environmental condition mentioned above was complied with and there are no further environmental or social issues to be reported on.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
