Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	ZUMTOBEL LIGHTING RDI
Project Number:	2017-0870
Country:	Austria / United Kingdom / Germany / France
Project Description:	The project concerned investments for research and development of innovative and more efficient lighting solutions including new kinds of services. A key R&D focus was in more intelligent, better connected and energy efficient lighting solutions. These activities were carried out mostly in Austria.

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

The R&D activities of the promoter concerned a variety of different luminaire products as well as components including smart lighting management solutions. As these products are all based on LED technology, the R&D programme helped to enable significant energy savings (up to 85% less compared to incandescent lamps and still up to 50% compared to fluorescent lamps).

The project activities did not fall under Annexes I or II of the EU Directive 2014/52/EU amending the EIA Directive 2011/92/EU and were therefore not subject to mandatory Environmental Impact Assessments.

Also no significant environment or social issues were noted.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
