Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	DOLNOSLASKIE PUBLIC HOSPITAL
Project Number:	2012-0245
Country:	Poland
Project Description:	The project covers the construction of a new public hospital on a greenfield site in the Fabryczna area of Wroclaw with a gross area of 48,700 m ² , providing a total bed capacity of 550 beds to support medical services for the inhabitants of Wroclaw and the Region of Dolnoslaskie.

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

No significant environment or social issues were noted. The project covers the construction of a new public hospital supporting 550 beds. The hospital was erected and is operating in accordance with all the standards and requirements related to impact on the natural environment. The only additional component introduced during the construction was the installation of acoustic screens on the roof, which enabled the noise generated by the refrigerating equipment to be reduced.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion, based on reports from the promoter, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
