Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	Jonkoping Municipal Investments
Project Number:	2015-0305
Country:	Finland

The Project concerns the financing of multi-sector investment schemes forming part of the Municipality of Jönköping's four-year investment programme from 2015 to 2018. The Project comprised of small to medium sized investment schemes in the fields of housing, education, childcare and community sports facilities.

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

The operation covered multi-sector investment schemes in the Swedish Municipality of Jönköping, located in southern Sweden, some 145 km east of Gothenburg and 325 km southwest of the Swedish capital Stockholm. The Municipality is located at the southern end of Sweden's second largest lake, Lake Vättern.

None of the schemes required EIAs as per the EIA Directive 2011/92/EU as amended.

As all the schemes were located in the urban territory of Jönköping, no protected Natura 2000 sites were affected by any of the schemes, and were compliant with the Habitats (92/43/EEC) and Birds (2009/147/EC) Directives.

The net environmental and social impact of the Jönköping Municipal Investments operation is positive, with improved environment and social conditions for the inhabitants in the Municipality.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the Promoter that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
