

Environmental and Social Data Sheet

Overview

Project Name:	ALTEIA (EGF VD)
Project Number:	2021-0188
Country:	France
Project Description:	Alteia has developed an AI-driven platform, offering a comprehensive suite of tools to enable digital transformation in enterprise asset management.
EIA required:	no
Project included in Carbon Footprint Exercise ¹ :	no

Environmental and Social Assessment

Environmental Assessment

The project includes R&D activities for the development of visual intelligence, artificial intelligence and data analytics for enterprise asset management. These activities are not listed in any of the annexes of the Environmental Impact Assessment (EIA) Directive 2014/52/EU amending the Directive 2011/92/EU.

The financed activities will be carried out in already-authorized and existing facilities that will not change their scope due to the project. Therefore, the project does not require any additional environmental permits.

Conclusions and Recommendations

In the light of the above, the project is acceptable for EIB financing in Environmental and Social terms.

¹ Only projects that meet the scope of the Carbon Footprint Exercise, as defined in the EIB Carbon Footprint Methodologies, are included, provided estimated emissions exceed the methodology thresholds: 20,000 tonnes CO₂e/year absolute (gross) or 20,000 tonnes CO₂e/year relative (net) – both increases and savings.
