Environmental and Social Completion Sheet (ESCS)¹

Overview

Project Name:	LUISS ROME UNIVERSITY CAMPUS DEVELOPMENT
Project Number:	2017-0344
Country:	Italy
Project Description:	The project consists of the financing of the 2016-2020 investment plan of the Libera Università Internazionale degli Studi Sociali Guido Carli (International Free University for Social Studies) in Rome. This investment plan foresees the development of student support facilities, teaching and internationalisation programmes as well as campus improvements.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The project comprised a variety of investments ranging from the renovation of academic and student residential buildings to modernise, optimise and improve their functional use and energy efficiency to the construction of a new building providing additional teaching space, the installation of electric charging points for vehicles within the Rome campuses as well as improvements to the development of new teaching material, enhanced digital platforms and systems to enable teaching and learning online and to strengthen the university's business continuity and resilience.

None of the project investments required an EIA as they were all below the threshold for screening or did not fall under either Annex I or II of the EU EIA Directive 2011/92/EU amended by EU Directive 2014/52/EU.

The Promoter reported that there were no significant environmental or social issues during the project's implementation. There were no specific environmental or social conditions attached to the project. The Promoter provided three energy performance certificates for three of the renovated buildings. Therefore, the Promoter has satisfactorily met the conditions and undertakings.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter during Construction and site visits at completion by the EIB team that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
