# **Environmental and Social Completion Sheet (ESCS)**

### **Overview**

Project Name: ENSINGER PLASTICS INNOVATION AND GROWTH

Project Number: 2018-0649

Country: Germany

Project Description: Financing of investments in research, development and innovation (RDI) in the field of high-tech engineering plastics manufacturing and application development, in manufacturing equipment and machinery and in buildings to support the company's growth over the period 2019 - 2021.

## **Summary of Environmental and Social Assessment at Completion**

# EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The project comprised investments in three components: (a) in R&D activities, (b) in manufacturing equipment and machinery and (c) in a new building and the implementation of building infrastructure in an existing manufacturing building.

The first two components were be carried out in existing already authorised facilities that will not change their scope due to this project component. The third component encompassed the construction of a new building inside the promoter's manufacturing facility in Nufringen (Germany) and the implementation of building infrastructure in a manufacturing building recently erected in Cham (Germany). The construction permit for the new building was already granted before project appraisal.

Increasing manufacturing and energy efficiency was a key driver of the RDI activities of the promoter.

No significant environmental and social issues in relation with the current project have been noted.

#### Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter during implementation and at completion that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
