Environmental and Social Completion Sheet (ESCS)¹

Overview

Project Name:	<i>GETINGE MEDICAL TECHNOLOGY RDI</i>
Project Number:	<i>20180192</i>
Country:	<i>Germany, Sweden, Denmark, France</i>
Project Description:	<i>RDI investments related to medical technology in the areas of acute care therapies, surgical workplaces and life science during the period 2018-2021.</i>

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The project's R&D activities were a central part of the promoter's operations and were embedded in the existing organisational and management structure.

The operating procedures in place were in line with best industry standards and were regularly audited externally.

The research activities undertaken in the project were aimed to result in new and improved medical devices with a positive impact on healthcare quality. Therefore, the project resulted in positive social impacts. The promoter played a key role during the COVID 19 pandemic as its product lines in ventilation and ECMO (Extracorporeal Membrane Oxygenation) were key for patient survival in intensive care.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
