Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	CAMPUS SACLAY-CENTRALE
Project Number:	2014-0084
Country:	FRANCE
Project Description:	The project concerned the construction of two buildings dedicated to teaching and research at the École Centrale Paris. In 2015, the École Centrale Paris merged with Supélec to form CentraleSupélec.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

One of the buildings (building A) was subject to obtaining an Environmental Impact Assessment (EIA). The opinion of the environmental authority was issued on 11 March 2014. The Promoter provided the EIA report to the EIB prior to project financing. The EIA report has been published on the EIB's website.

Building B was not subject to an EIA. The screening out decision was issued by the environmental authority on 09.01.2014.

The Campus was built on an existing development zone and does not have any impact on a Natura 2000 site.

The buildings were designed to have an energy performance level beyond the thermal regulations RT2012 in force at the time of appraisal by adopting a level of Cep RT20121 - 25%.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the Promoter and a site visit by the EIB team after completion that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
