## Environmental and Social Data Sheet

### Overview

Project Name: *ENEL DIGITAL & EV RDI*  
 Project Number: *2022-0995*  
 Country: *Italy, Spain*  
 Project Description: The project includes the promoter's investments in innovative technologies for: (i) the development of software solutions, digital platforms, tools and services, supporting all different aspects of the vehicle charging process and customer charging experience; (ii) the development of hardware and firmware solutions for AC and DC recharging products (the “**Project**”).  
 EIA required: no

Project included in Carbon Footprint Exercise<sup>1</sup>: no

(details for projects included are provided in section: “EIB Carbon Footprint Exercise”)

### Environmental and Social Assessment

#### Environmental Assessment

The Promoter’s RDI activities financed by the Bank concern the development of software, hardware and firmware solutions. The Project’s activities which will be carried out in existing facilities, which are already authorised and will not change their already authorised scope due to the Project. The Project is not subject to an EIA as such activities are neither listed in Annex I nor Annex II of the EIA Directive 2011/92/EU amended by Directive 2014/52/EU.

The Project will contribute to develop innovative hardware, software and digital technology solutions supporting the deployment and adoption of electromobility by private customers, corporate and public sectors. It will in general help lower the existing barriers for a wider adoption of electromobility, therefore contributing to climate action mitigation. It is expected to contribute to further knowledge creation and diffusion, to the transformation of the automotive and transport industry in the direction of electrification and increased sustainability and will directly and indirectly contribute to preserving and scaling up R&D employment and contribute to economic growth in Europe.

#### EIB Paris Alignment for Counterparties (PATH) Framework

- The counterparty ENEL SPA is in scope and screened into the PATH framework, because it is considered high emitting.
- The counterparty already meets the requirements of the EIB PATH framework with its existing alignment plan.

#### Other Environmental and Social Aspects

<sup>1</sup> Only projects that meet the scope of the Carbon Footprint Exercise, as defined in the EIB Carbon Footprint Methodologies, are included, provided estimated emissions exceed the methodology thresholds: 20,000 tonnes CO<sub>2</sub>e/year absolute (gross) or 20,000 tonnes CO<sub>2</sub>e/year relative (net) – both increases and savings.

Luxembourg, 9<sup>th</sup> June 2023

The Promoter has recently received all the relevant certifications for properly managing environmental and social aspects, among which ISO 9001, ISO 14001, ISO 27001, ISO 37001 and ISO 45001.

The Promoter forecasts a 33.6% gender split in 2025 out of a total of 1 211 full time equivalent (FTE) staff members. This is an improvement compared to the start situation, when there were no policies implemented

## **Conclusions and Recommendations**

Given the aforementioned considerations, the Project is acceptable for EIB financing in E&S terms.
