Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	SCHALLSCHUTZPROGRAMM BRANDENBURG
Project Number:	2013-0217
Country:	Germany
Project Description:	Framework Loan to finance a regional programme comprising noise prevention measures in existing buildings (incl. high efficient glazing and insulation of walls and roofs) to protect the population in the designated areas against noise from the new Berlin-Brandenburg airport.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The Project comprised works to buildings in the designated areas around the airport Berlin Brandenburg to implement noise protection measures, with some secondary energy efficiency gains, which has led to noise reduction within the individual buildings.

None of the schemes required Environmental Impact Assessment, nor had a significant impact on Natura 2000 sites. The Promoter has maintained dialogue and consultations with the public concerned, through various channels, including Aircraft Noise Commission and Dialogue Forum.

Project implementation and management capacity of the Promoter is considered acceptable based on the overall outcomes related to the investments co-financed.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
