Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	RADOM MUNICIPAL INFRASTRUCTURE II
Project Number:	2015-0690
Country:	Poland
Project Description:	Co-financing of small and mid-sized investment schemes in the City of Radom as part of the City's development plan.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The operation comprised a total of 21 schemes covering the following sectors: soft modes infrastructure (footbridges), streets and urban roads, public buildings and facilities (e.g., sports facilities, schools/ kindergartens, rehabilitation center etc.) and urban revitalisation and enhancement of public spaces (e.g., parks and public squares). The type of schemes that were financed are largely the same as those foreseen at appraisal stage.

The Promoter reported that none of the schemes subject to a screening, in line with EIA Directive 2014/52/EU amending Directive 2011/92/EC, required an Environmental Impact Assessment from the competent authorities and that mitigation measures provided in screening decisions were implemented.

Due to the locations of the schemes (urban area), no scheme had an impact on Natura 2000 protected sites and therefore none was subject to Appropriate Assessments according to the Habitats Directive (92/43/EEC) and Birds Directives (79/409/EEC).

The project supported the implementation of City's Development Strategy 2008-2020, Road Development Plan for 2011-2020, and Programme for Environmental Protection, which has been subject to a Strategic Environmental Assessment.

No significant environmental or social issues were raised by the Promoter.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the Promoter, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
