Environmental and Social Completion Sheet (ESCS)¹

Overview

Project Name:	PSA EFFICIENT POWERTRAINS
Project Number:	2015-0265
Country:	France
Project Description:	The project concerns (i) Research and Development investments on Euro 7 compliant powertrains and (ii) Capital expenditures in manufacturing facilities in cohesion regions associated with the manufacturing of the developed fuel-efficient engines.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The R&D activities aimed at the improvement of the environmental characteristics of motor vehicles mainly in terms of reduction of fuel consumption, hence of CO₂ emissions. R&D activities were carried out in existing R&D centres of the promoter in France, Germany and Italy. Capital expenditures for machinery and equipment for the production of engines and transmissions were carried out in four existing plants of PSA in France.

No Environmental Impact Assessment (EIA) was required by the relevant Competent Authorities for these project activities. No environmental issue was reported during implementation.

The Environmental Management Systems of all the promoters manufacturing sites around the world have been certified according to the ISO 14001 standards.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
