Environmental and Social Completion Sheet (ESCS)¹

Overview

Project Name:	Zlin Regional Infrastructure III
Project Number:	2014-0007
Country:	Czech Republic
Project Description:	A multi-sector framework facility for financing investment schemes within the Region's investment programme

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The Project consisted of investments in accessibility (transport), public infrastructure and services (social care, education, health and culture), as well as energy savings in public buildings, under the Regional Development Strategy 2009-2020 of Zlin Region. None of the schemes required Environmental Impact Assessment or required an Appropriate Assessment in relation to potential significant impacts on NATURA 2000 sites.

No significant environment or social issues were noted, and the net environmental and social impact of the programme is deemed positive. Benefits include increased energy efficiency of public buildings, improved mobility (thanks to modernisation/rehabilitation of existing roads) and enhancement in the general level of health and quality of life (thanks to the modernised public facilities).

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion, based on the reports from the promoter, that the Project has been implemented in line with EIB environmental and social standards applicable at the time of appraisal.
