Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	REGIONAL ROLLING STOCK MALAB
Project Number:	20150009
Country:	Sweden
Project Description:	Purchase of new train-sets to provide passenger services in the Stockholm-Mälaren Region.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The project consisted in the purchase of 33 new electrical trainsets to provide passenger services in the greater region around Stockholm and Lake Mälaren, Sweden.

The new trains are 105 meters long, each with about 340 seats excluding additional foldable seats, with a drivers' cab at each end and can be operated in both single and in multiple mode with up to 4 vehicles. The maximum speed is 200 km/h. The project included the purchase of high value spare parts, documentation and training, testing and commissioning.

About half of the new trains have been used to replace existing life-expired trains.

The disposal of the replaced old rolling stock is under the responsibility of the former train operating company, SJ, which is applying adequate, strict procedures on scrapping.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
