## Environmental and Social Completion Sheet (ESCS)<sup>1</sup>

### Overview

Project Name: *SPEE EN PICARDIE*  
 Project Number: *2014-0158*  
 Country: *France*  
 Project Description: *Programme loan to support Energy Efficiency investments in private residential buildings in France.*

### Summary of Environmental and Social Assessment at Completion

**EIB notes the following Environmental and Social performance and key outcomes at Project Completion.**

The project supported the improvement of the energy performance of residential buildings in Picardie region and after regional reform in the whole Haut de France region. Energy consumption for heating purposes in the buildings targeted by this project was reduced, as well as the use of renewable energies increased. This contributes to reducing greenhouse gas emissions by an estimated 5191 t CO<sub>2</sub>eq.

All schemes met the Bank's energy efficiency eligibility criteria and with the principles of the Energy Performance of Buildings Directive 2010/31/EU as amended by Directive 2018/844/EU. No Environmental Impact Assessment was required during the implementation of the project. The Promoter did not report any Environmental and Social concern.

Temporary nuisance due to construction works (dust, noise) were mitigated through appropriate site organisation and construction management.

#### **Summary opinion of Environmental and Social aspects at completion:**

EIB is of the opinion based on reports from the promoter that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
