Executive Summary

Introduction

Government of Madhya Pradesh with its vision 2018 has decided to upgrade the quality of the life in its capital city Bhopal by providing a highly efficient and comfortable state of art urban rail system. In this context, this document represents the Resettlement Policy Framework (RPF) for the proposed Orange Line (from Karond Square to AIIMS) and Blue Line (from Bhadbada Square to Ratnagiri Tiraha) of Bhopal Metro Rail Corridor of Phase I Project. The main purpose of this document is to provide guidance in identifying the potential adverse social impacts associated with land acquisition and propose appropriate mitigation measures. Since the project is to be implemented with the support of the European Investment Bank (EIB), the Madhya Pradesh Metro Rail Company Ltd. (MPMRCL) prepared this SIA to ensure full compliance with the requirements of safeguard policies of the aforesaid institution and all applicable National policies. This SIA also contains all the National and local policy provisions that are applicable for mitigation of adverse social impacts. This document also contains monitoring and evaluation mechanism of resettlement.

Impacts

A total of 1342 properties are likely to be affected out of which, 496 are residential properties, 514 are Commercial properties, 133 are Residential cum Commercial properties, 4 open plots and 195 are Common Property Resources (CPR). There are a total of 1563 affected Households out of which 373 are titleholders and 1190 are non-titleholders. About 1218 structure are fully affected and 124 structures are partially affected. Out of 1682 PAHS, about 496 PAHs will lose their Residential structures, 514 PAHs will lose Commercial structures, and 133 PAHs lose Residential cum Commercial structures, 4 PAHs will lose their Open Land and there are about 195 Community Property Resource (CPR) structures.

Socio-economic Survey

Socio-economic survey was carried out for 1525 PAFs along the project stretch who are available at the time of the survey. The total population among the surveyed PAFs is 6356. Percentage of Male and Female is 53.2% and 46.8 % respectively. Average household size of the total PAFs is 4; The Gender ratio is 880 per 1000 males. Out of the total affected, majority PAFs belongs to backward caste and also majority belong to Nuclear Family. The largest percent of annual income of surveyed PAFs fall under 1 to 2 lakhs per annum. Occupation pattern of the majority PAFs is business.

Vulnerable Households (VHs)

The vulnerability of the project affected families has been determined by the people falling in the category of scheduled caste, scheduled tribe, below poverty line (BPL), age above 60 years, women headed family and disabled. If the households fall under BPL as a result of loss of livelihood/assets due to the proposed project, then they shall also be classified as vulnerable family. The study indicates that 830 VHs are identified under vulnerable category.

Stakeholder /Public Consultations

The Public Consultation not only minimizes the risks and unwanted political propaganda against the project but also abridges the gap between the Community and the Project Formulators, which leads to timely completion of the project and making the project people friendly.

Public Consultation/information is an integral part of the MPMRCL project cycle. Consultations with the Project Affected People (PAPs) were conducted as part of Social Impact Assessment. Attention was given to potential vulnerable people like, squatters, encroachers, schedule caste, and Other Backward Section (OBC) of Society were consulted to identify adverse impacts of the project.

Policy Legal Framework

The Right to Fair Compensation and Transparency in Land Acquisition and Resettlement and Rehabilitation (RTFCTLARR) Act, 2013 is applicable in all the States in India. RTFCTLARR, Act 2013 is a first National/Central law that addresses land acquisition and rehabilitation and resettlement

Resettlement & Rehabilitation of PAPs

The proposed Metro Rail Project for Bhopal in the State of Madhya Pradesh has received approval from Govt. of India (GoI) for its implementation under legal framework of Metro Railways (Construction of Works) Act, 1978, Metro Railways (Operation and Maintenance) Act, 2002, Metro Railways (Amendment) Act, 2009' and The Railways Act, 1989.

The land for Bhopal Metro Rail Project will be acquired under 'The Metro Railways (Construction of Works) Act, 1978'. The compensation and assistance for land acquisition will be provided according to the provision of Resettlement Policy Framework guided by the RFCTLARR 2013 and the EIB Social Standards, while, acquiring land under the Metro Railways Act as stipulated under Section 105 of the RFCTLARR 2013.

An Entitlement Matrix has been formulated for the Madhya Pradesh Metro Rail Project as per the provision of Section 107 of the RFCTLARR 2013, which empowers State Government to make such policy conferring higher compensation and assistance than provided under the said Act.

Compensation and R&R assistance will be paid to all the eligible Project Affected Households as per the provisions outlined in the Entitlement Matrix

Institutional Arrangement

The institutional arrangement for project implementation is that; the Executive Agency (EA) will be government of Madhya Pradesh (GOMP) through Madhya Pradesh Metro Rail Corporation Ltd. (MPMRCL) and has been equipped with adequate capacity to implement the project. Further, to ensure the efficient grievance of PAFs, a Grievance Redressal Committee (GRC) is proposed by MPMRCL. Besides, community participation is also given utmost importance in the Resettlement Action Plan (RAP) as it can only be effective when the community is provided access to direct involvement. The whole plan is proposed to be done by meticulously implementing step-by-step process which involves: Information dissemination, focus group discussions with vulnerable groups, public meetings, measures to tackle with risks like HIV/AIDS during the construction, and community involvement. Monitoring of all the activities especially when it comes to project affected vulnerable groups (such as scheduled castes, BPL families, women headed households, widows, old aged and the disabled) will be given a special attention. RAP implementation will be monitored both internally and externally. The Independent External Consultant hired by MPMRCL will be responsible for internal monitoring through their field level officers and will prepare quarterly reports on the progress of RAP implementation and mid and end term evaluation of RAP implementation.

Budget:

The total cost for R&R implementation plan is estimated at Rs. 446.87 Crore (Rs 4468.7 million) or \$ 55.95 million (@ 1 USD = 79.87 INR). The budget is indicative and costs would be updated and adjusted to the inflation rate as the project continues and during implementation. The final compensation amount for the land acquisition and structures will be determined by the Competent Authority.

SOCIAL IMPACT ASSESSMENT (SIA)

Chapter 1: Introduction

1.1 Project Background

Government of Madhya Pradesh with its vision 2018 has decided to upgrade the quality of the life in its capital city Bhopal by providing a highly efficient and comfortable state of art urban rail system. The planned metro rail will provide comfortable, fast and attractive transport system to the people of Bhopal with its station areas as livable, clean and beautiful places to transit and to meet various people, contributing positively to the environment and improved social life. The urban sprawl of Bhopal is expanding at a very fast rate and its population is over 17 lakhs as per 2011 census. With the fast-growing population, there is a need for high quality mass transport system for the city to attract its people and to use clean and sustainable mode of transport to lead a safer, secure, healthy and high quality of life.

Bhopal metro rail system is based on steel – wheel-technology and uses standard gauge tract of 1435 mm. The system shall be designed for a maximum operational speed of 90 Kph. The following two metro lines shall be taken up in the first phase as given in **Table 1.1**:

1.4 Maintenance Depot

The Blue Line and Orange Line would have only one Central Depot near Subhash Nagar Underpass. The Depot will have facilities for stabling, inspection and maintenance of vehicles. Typically, mechanized washing plant is provided at the track entry so that at the time of entry, the trains can be externally washed while on a run through at low speed. The Depot also houses the Central control for monitoring the train operations and acting in case of emergencies. The relief and maintenance vehicles are also housed here.

1.5 Details of Project Location – Bhopal District and City Profile

The Bhopal district in Madhya Pradesh state in India is part of Malwa plateau with generally an undulating topography. The Vindhyan hill range occupies the eastern part of Phanda block, including a major part of Bhopal city. The geological formations underlying the Bhopal area – at the eastern edge of the Malwa Plateau – are largely red sandstone strata, with the depth of the rock varying according to the slopes. The top portions of the hillocks generally consist of hard red soil, mixed with basaltic boulders.

Almost three-fourths area of the Bhopal district is covered with black cotton soils forms by the weathering of basaltic rocks. The rest part of the district area is covered with yellowish-red, mixed soils derived from sandstone and shale. The alluvial soils are found along the river courses. The higher elevations i.e., the hilly regions have a cover of Murum, which is made up of small rounded pieces of weathered basalts. The Vindhyan have a thin cover of sandy loams. The alluvium is derived from hill slopes by numerous streams and watercourses. The black cotton soil is seen at various depths from 1 to 3.0m in Bhopal city.

The Bhopal Development Plan 2005 had projected a total population of 25 lakhs in the planning area. The present gap in rising population and supply of housing has resulted in growth of unauthorized settlements. The draft Bhopal Development Plan (BDP) 2021 has proposed a total land use area of 812.86Sq.km out of which 365.67 Sq.km is city land area and remaining are water bodies, farms and forest. Though there is no land use conversion in total area of existing farms, water body and forest area of BDP-2005, the new addition of land in BDP-2021 is Greenfield in nature with the inclusion of additional city land area by 193.12Sq.km. The future growth of population is defined in terms of self-contained sub-cities/townships in order to regulate the future growth of the city. The areas in south of Mandideep near Narshingharh road and towards the east in Chhola road constitute proposed part of the planning area. The proposed sub-cities have been envisaged with nexus to the present transport corridors and the mass transport network would also facilitate provisions to inter link with the overall city road network, integrating the sub-cities through transport network.

The population of Bhopal City as per 2011 Census is 1,798,218; of which males and females are 936,168 and 862,050 respectively. However, Bhopal urban / metropolitan population is 1,886,100 of which 981,860 are males and 904,240 are females. The population density in Bhopal district is 398 which is far lower than the State's population density of 855 per Sq.km. The sex ratio reflects the socio-economic and demographic characteristics of the population. It is an important indicator of migration and gender equity (in a developing country context) since it helps to point out the employment opportunity in the districts. The sex ratio in Bhopal City is 919, which is lower than the State's sex ratio of 931 females for every thousand males.

Literacy rate is a significant indicator of any city or district or state's economic as well as social

development status. The higher literacy rate indicates higher awareness and vice versa. The Literacy rate of Bhopal City according to the 2011 Census is 83.47%, of which male and female literacy was 87.45 and 79.16 percent respectively.

The economy of Bhopal is essentially divided into modern and traditional industries. The prominent industries in the old city are cotton, electrical goods, jewelry and chemical industries. The other industries include cloth weaving, making sports equipment, sealing wax and making matches. Being the State capital Bhopal City also accommodates many reputed Insurance companies, banks and other financial organizations. M P Nagar is Bhopal's most prominent commercial area and accommodates many reputed business houses. Bharat Heavy Electricals Limited (BHEL), which is the largest manufacturing and engineering enterprise in India, has its unit in Bhopal. The industrial suburb of Bhopal is Mandideep, which accommodates many plants belonging to some of the esteemed companies including Eicher, Crompton Greaves, Procter and Gamble, Larsen and Turbo, Fujitsu and HEG.

1.6 Benefits from the Project

The urban sprawl of Bhopal planning area is 812.26 Sq. km. and the population in the metropolitan area is over 2.3 million which is projected to increase to 4.3 million by the year 2041. The per capita trip rate is 1.17 for the motorized trips and the accident rates are quite high with about 9 % of them being fatal accidents, and 236 persons died in road accidents with the severity rate of 6.8 per 100 accidents in the year 2014. The number of vehicles is increasing rapidly every year and has already reached to about one million now. All these factors have resulted in the shortage in road space for movement and parking of vehicles, space for non-motorized vehicles and pedestrians. This is also contributing substantially to the increased level of dust, air and noise pollution due to more time spent on the travel time. The increase in road area also needs frequent and time to time maintenance but this maintenance is not happening due to various factors like fewer funds, climate, traffic, other infrastructure works on the road like laying of cables etc., and other social events.

Therefore, a high-quality rail-based Mass transport system is needed for the city of the Bhopal to attract its people to use clean and sustainable mode of transport to lead a more safe, secure, healthy and high quality of life contributing to maintain the ecosystem and contribute to climate change mitigation and sustainable development and by minimizing converting further green area into built-up area.

The metro rail project is expected to yield benefits resulting from the safe and smart mass transport such as less travel time, and better accessibility, reliability and availability at any time leading to peace of mind and freedom with seamless movement and high quality of life. The expected benefits of the project include:

- Employment opportunities due to construction, operation and maintenance
- City aesthetic and image due to location, design and construction
- Reduction in traffic congestion
- Reduction in travel time with high service level
- Reduction in accident
- Reduction in fuel consumption
- Reduction of GHG emission

- Air pollution reduction
- Economic prosperity
- Optimality in transportations

The above environmental as well as economic and social benefits contribute to enhancing the efficiency and competence of the city leading to attracting more investments in economic and business activities and creating high quality of life. The implementation of the project therefore will definitely be advantageous to improve the environmental quality of the Bhopal City and for achieving its all-round economic development and progress.

Chapter 2: Study Approach and Methodology

2.1 Objectives of Social Impact Assessment (SIA) and Resettlement Action Plan (RAP) for Bhopal Metro Rail Project

The objective of Social Impact Assessment (SIA) is to prepare a complete inventory of structures and affected families and persons and to identify social impacts. The objective of Resettlement Action Plan (RAP) is to provide project affected families with appropriate compensation in accordance with R & R policy to enhance or restore their standard of living.

Infrastructure projects such as metro rail projects will have impact on the private assets and their livelihood as these projects involve acquisition of land. The impact will be more on marginal and vulnerable groups affecting their livelihood when land acquisition takes place. These projects also necessitate the displacement of unauthorized dwellers such as squatters, kiosks and encroachers. In order to minimize the impacts and maintain the former standard of living and address the social issues arising out of land acquisition a detailed SIA and RAP was proposed to be undertaken for Bhopal metro rail project as per RTFCTLARR Act 2013 Section 2 (4) and EIB guidelines.

The SIA and Resettlement Action Plan is prepared containing the following;

- List of displaced families and likely to be displaced families
- List of infrastructures in the affected area
- List of land holdings in the affected area
- List of businessmen in the affected area
- List of landless people in the affected area
- List of vulnerable groups like persons belonging to Scheduled Castes or Scheduled Tribes, handicapped persons, in the affected area
- Approach to mitigation
- Measures to avoid, mitigate and compensate impact
- The RAP will include a description of institutional structures and key person responsible for mitigation measure and timelines and costs for each activity
- Specify the role of NGOs'/CBOs', if involved
- Indicate capacities required and capacity building plan, including technical assistance, if any
- Time lines for each activity
- Analysis of Costs and Benefits and Recommendation on Acquisition

2.2 Scope of SIA and RAP

The overall scope of work for SIA and RAP involves the following:

- Designing of Survey schedules for Census & Socio-economic survey of affected families
- Identification of types of assets lost
- Undertaking visits to project locations

- Base line socio-economic survey
- Preparation of Social Impact Assessment and its analysis
- Preparation of RAP in accordance with the State and Central Government and EIB guidelines
- Public Consultation / Stakeholder meetings
- Preparation of Cost estimation and R&R budget
- Preparation of comprehensive RAP
- The scope of SIA is to determine:
 - Total area of impact under the proposed project, including both lands to be acquired and areas that will be affected by social and other impacts of the project
 - Size of holdings, ownership patterns, land distribution, number of residential houses (public and private) infrastructure available or to be provided in the proposed land and assets
 - Number of affected families and the number of displaced families among them and enumerating all affected families
 - Socio-economic and cultural profile of the affected area
 - Identify and assess the nature, extent and intensity of the positive/negative social impacts associated with the proposed project and land acquisition.
- The scope of RAP is to:
 - Present ameliorative measures to be undertaken to address the social impacts identified in the course of the assessment
 - Assess the viability of impact mitigation and management strategies with clear indication of costs, timelines and capacities
 - Present measures to be taken up for Rehabilitation and Resettlement and compensation payment for all categories of affected families
 - Responsibility of planning, implementation and monitoring of resettlement and rehabilitation activities in the Project; Budget for R&R activities;

Overall, the SIA provides an assessment of adverse social impacts, social costs, benefits of proposed project and land acquisition (including mitigation measures). It also provides an assessment to understand whether the benefits from the proposed project exceeded the social costs, and whether there are any adverse social impacts that are likely to be experienced by the Affected Families.

As per SIA standard guideline, it was important to formulate and implement the RAP strategy for ensuring effective land acquisition and resettlement and rehabilitation. The RAP assessed the viability of impact mitigation and management strategies with clear indication of costs, timelines and capacities.

2.3 Approach and Methodology

The approach and methodology for achieving the two specific objectives of preparation of SIA and RAP contained primarily the following:

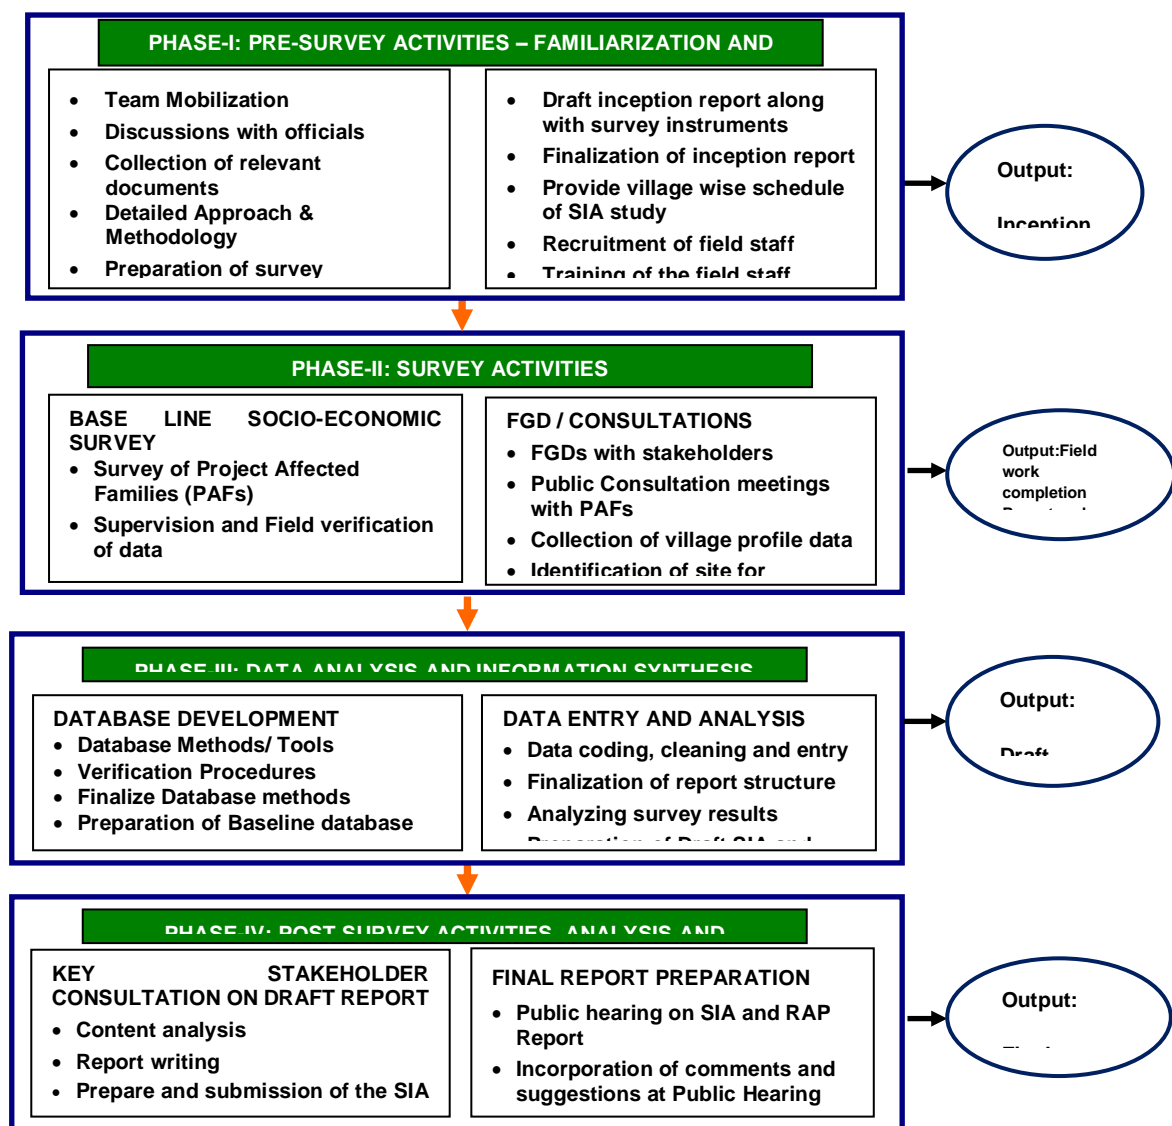

- Sequential progression of activities for conducting the study; and
- The research techniques and methodologies to be employed for achieving the tasks

Utmost care is taken to ensure that the SIA and RAP has incorporated all the critical elements, methods and protocols of a scientific survey. To ensure optimum co-ordination and delivery of reports in accordance with the study schedule, the study was carried out and delivered through sequential processes consisting of the following four phases as presented in Figure 2.1:

- Phase-I: Pre-survey activities
- Phase-II: Survey activities
- Phase-III: Data analysis and information synthesis
- Phase-IV: Post-survey activities and reporting

The primary data was collected through survey method using structured interview method while secondary information was systematically collected and reviewed to assess the positive and negative impacts of the project.

Figure 2.1: Process Flow Chart of Social Impact Assessment and RAP

2.3.1 Primary Survey and Consultations

Census survey was conducted by deploying trained field investigators. The census survey was carried out from 4th June 2019 to 19th July 2019. Due to changes in the station width again census survey was carried out from 6th January 2022 to 20th February 2022. However, the cutoff date will be 4th June 2019. One to one household details were collected by using a structured questionnaire through personal interview. Except door locks, all the PAFs were covered under census survey. Implementing agency can make attempt during the verification of PAFs and include those details who could not be contacted due to various reason during SIA preparation stage. Both qualitative and quantitative approaches were followed in the study. Various tools of data collection like interview schedule, Focus Group Discussions (FGDs), in-depth interviews, and transect walks were used during the survey.

PRA (Participatory Rural Appraisal) techniques for people's participation and public consultation were applied while conducting the study, SIA process, and proposed RAP. Spot visit and census survey were conducted. PAFs were educated and sensitized about the project.

As part of the Socio-economic survey, wide range of consultations with different impacted groups and other Stakeholders were conducted to ascertain their views and preferences. Socio-economic survey was conducted for all Project Affected Families in all project affected areas and the overall Socio-economic condition of the Project Affected Families and impact was assessed. Major issues related to land acquisition, displacement, demolition of structure, compensation package, job opportunities, problems of working women, perception about the project, public infrastructure facilities etc., were covered. Discussions were held with groups like SHGs, youth club representatives, Ward members etc.

Public discussion is very crucial process in SIA. Hence the study has developed an effective public consultation plan to involve all Stakeholders. Public consultations were held with groups affected by the project living nearby; those who will see development; those who are forced to relocate because of the project; and those who have interest in the new project or policy change but may not live in proximity. Others affected groups included those who might normally use the land on which the project is located and those who will be indirectly affected by the project. Once identified, groups were systematically consulted to determine potential areas of concern/impact, and ways each group might be involved in the planning and decision-making process.

2.3.2 Capacity Building and Testing of Survey Instruments

The required field researchers and investigators who are familiar with local conditions as well as Hindi language were recruited. A two-day field-based training was conducted for field staff - field supervisors, investigators at Bhopal by the key experts of CMSR. The training focused on orienting the field staff on the basics of project, questionnaires, roles and responsibilities, field planning and logistic support, quality aspects, etc. Testing of the draft instruments such as questionnaires, checklists and matrices was done for collecting both quantitative and qualitative data/information from the field. The insights gained from field-testing were used to finalize the instruments.

2.3.3 Socio-Economic Survey

Following the testing of study instruments a full-fledged survey was undertaken for collecting data/information through the study instruments from the Project Affected Families and

Persons. The Census/Socio-economic survey was conducted to capture the following information:

- Identification of the household: Name, gender, nationality, religion, social group, sub-caste, earlier displacement status, category of the project affected household;
- Household composition: Age profile of the families/social /gender category of families, marital status, literacy levels, occupation and monthly income levels, skill set, disability, and residential status;
- Family details: Type of family, accessibility to government entitlements such as PDS, Aadhar card, NREGA job card, and health card.
- Vulnerable persons/families: (poor, SC/ST, women headed, aged/infirm, physically or mentally challenged) with socio-economic profile;
- Ownership of assets: Ownership of agriculture land, area affected, irrigation facilities, nature of ownership, leased in and leased out land, number and structures and assets owned or occupied and affected, crops cultivated and trees affected;
- Loss of employment/livelihood;
- Access to basic services, health status; participation in development schemes of the government; level of mainstream linkage, outstanding debts;
- Economic details: Business details, income on business; ownership of livestock and other assets
- Membership in village institutions, food security, health related, gender related, women participation and contribution in family.
- Awareness about HIV/AIDS, awareness about Bhopal Metro Rail Project

2.3.4 Focus Group Discussions (FGDs)

The Focus Group Discussions (FGDs) and community level consultations were conducted with PAF's, SHGs, youth associations and local line departments regarding displacement, shifting of common property resources, affected structures, livelihood losses, gender and utilities etc. Impact on Common Property Resources is assessed.

2.3.5 Public Consultations

Public Consultation was a continuous process followed throughout the duration of SIA study. The project team strongly believed that the voluntary participation of affected people was important to understand their needs. It was important to ensure that all the information regarding SIA was disseminated to the affected families to make them informed. Engagement of the affected people in the project from the beginning was considered essential to avoid friction at later stages of the project. To understand the local dynamics and various developmental problems present in the affected area, various stakeholders were consulted during the study. The participatory meetings were used to educate the affected people on the proposed project and to consider their views.

The key outputs of all the above activities from the field survey data findings, review of literature, focus group discussions and public consultations have contributed to the following:

- Development of data base of the PAFs

- Socio-economic profiles of PAFs
- Inventory of assets and Common Property Resources affected
- Social impacts associated with the project
- Cost estimation and R&R budget
- Resettlement Action Plan
- Summary of consultations and FGDs with the stakeholders and
- Institutional arrangement for implementation of RAP

2.3.6 Review of Secondary Data and Reports

The primary and secondary data which were available at different sources were collected and reviewed. The review helped the team in conceptualizing and designing the study and also in identifying the key stakeholders. Some of the documents reviewed included the following:

- 1) RTFCTLARR Act 2013
- 2) Policies of Government of MP
- 3) Land Acquisition Maps/drawings
- 4) Final location survey report from Executive Engineer Office Bhopal Metro Rail
- 5) Proposed Alignment Maps
- 6) District Hand book
- 7) Census Reports
- 8) Others as useful and relevant

2.3.7 Consultations with Officials

Initial meetings were conducted after the award of the contract with the key officials of GC and MPMRCL to:

- Understand the client expectations of the study
- Identify sources and collect relevant literature
- Understand the alignment and design of the project
- Collect information on key contact persons who were required to be contacted during the study/field work
- Mutually agree on the structure of specific deliverables and timelines
- Request assistance and cooperation of relevant agencies and of other stakeholders, as the case may be

2.3.8 Analysis and Data Updation

A data entry program was developed in EPI Software for the entry of the data collected and to create a data base of the PAPs. The quantitative data collected by the site team were coded by them after the questionnaire were administered or towards the end of the day. The data collected from the field were entered into the System. Once the data was entered, the

database management experts performed a cleaning exercise of the data set.

The information collected through structured interviews and questionnaires was systematically coded, validated, analyzed and tabulated. Wherever required, the observations were supported with the information collected through desk research. Content analysis of discussions, which were held during FGDs were supplemented with primary data. The tabulation plan, covering every aspect of the study was designed with suitable cross checks. The data was first entered in data entry package- EPI and then exported to SPSS (Statistical Package for Social Sciences). The entered data were once again cleaned using the appropriate validation checks. The data analysis has taken the following forms:

- A tabulation plan was prepared considering the basic variables of the project.
- Tables and cross-tables were generated – based on the assignment objectives.
- Friendly graphs and charts were incorporated to illustrate the important findings and trends.

2.4 Team of SIA and RAP

A multidisciplinary team was mobilized in accordance with the study. The team consisted of qualified and experienced professionals in the relevant sectors with domain qualifications and experience in the following sectors: One Senior Social Scientist, a Project Coordinator, an R&R expert, and a Computer Analyst. In addition to the key professionals, adequate number of field teams consisting of field supervisors and field investigators, field and office editors, data entry operators were mobilized and engaged in project work.

Chapter 3: Project Impacts and Inventory Loss

3.1 Background

A Census and Socio-economic survey of Project Affected Families was conducted with the help of a structured questionnaire and detailed information on affected property, impacts on private assets, loss of incomes and livelihood was collected for a full understanding of the project impact. The objective of the survey was to generate an inventory of social impacts on the people affected by the project, type of property, ownership of property, type of impact and its magnitude and details of affected property.

However, with the decision of increasing the Station Box lengths from 96 m to 140 m and modifying/re-orienting the Stations Entry & Exit locations and setting aside certain Entry & Exit provisions as future requirements, the Census and Socio-economic survey was again taken up during Jan-Feb 2022 at all the Station locations to capture the changes in R & R Impacts due to this decision. Further, the Census and Socio-economic Survey was also taken up during this period at the Depot Land located at Subhash Nagar, which was not included during the initial survey period. Thus, there is a change in the project impact figures from the initial Survey figures. The change in the PAPS comparing the initial survey conducted during 2019 with 96 m Station Box lengths and the survey conducted after increasing the station Box lengths to 140 m is discussed in Section 3.9 in this Chapter. Though the PAPs number would increase/decrease, a conscious effort will be made during the implementation of R&R through RISA to ensure that minimum displacement of PAPs would happen.

The Construction activities at the Priority Corridor of the alignment i.e., AIIIMS to Subash Nagar has already commenced and in the process of handing over the site to the Contractor, the PAFs/PAPs from Azad Nagar had to be relocated. Further, at Saket Nagar, all the PAPs who were listed in the survey, were already identified under PMYA Scheme by the Bhopal Municipal Corporation (Nagar Nigam). The details of such areas and the relocation of PAFs/PAPs are discussed separately in Section 3.10 in this Chapter.

Further, subsequent to undertaking the socio-economic and Census survey along the project alignment, certain projects like Smart City Development and City Development Authorities were being executed and since the execution of Metro project had to be reschedule for various reasons such as Pandemic situation and the Metro packages were Global tenders. The city level projects were planned and executed earlier than the Metro Project. One such area along the Metro alignment is Jawhar Nagar Square falling in Blue Line. The PAPs listed at this area are being taken care by the State Authorities under Smart City Development project and in the process, the sites are being cleared and made available for Metro Project. Hence the PAPs of Jawhar Nagar area are not being include for Metro Rail project and are excluded from the list.

3.2 Overall Project Impacts

Table 3.1 shows the overall project impacts on lands, structures, and families /persons. There are about 1342 properties that are likely to be affected out of which, . about 496 PAHs will lose their Residential structures, 514 PAHs will lose Commercial structures, and 133 PAHs lose Residential cum Commercial structures, 4 PAHs will lose their Open Land and there are about 195 Community Property Resource (CPR) structures. Out of 1342 properties, 809 properties are on Government Land and 533 are on Private Land. A total of 1218 properties are going to be Fully Affected and 124 properties would be Partially Affected. Based on the property identification, the number of Project Affected Households (PAHs) has been determined. A total

of 1563 Households are likely to be affected out of which, 373 are Titleholders and 1190 are non-Titleholders. Corridor wise magnitude of impact is given in **Table 3.1**.

3.2.1 Land Requirements for the Project

Land was proposed to be acquired for the Depot, Receiving Substations (RSS), and Entry & Exit locations and for Stations. It was ensured that majority of the land requirement was met from the Government land such as open spaces from existing public area, roads and its shoulders. Where Government land is not available, certain private land is proposed to be acquired. No temporary land has been proposed for acquisition from private properties. Land for temporary needs during the construction phase of the project is proposed to be used from Governmental properties. Only vacant land from Governmental properties was proposed to be used for such purposes and would be returned back after completion of construction and hence it is not included in land requirement.

Most of the Metro alignment proposed is an elevated section and most of the elevated section is on the road and therefore needs only space of up to 2m diameter for the columns from ground level and above the foundation structure. Generally, an average of 3 meters from the centerline of the alignment in the road towards both the sides of the road was estimated as the required free land for the foundations. It was roughly estimated that at the road level only 2m X 2m of the space would be effectively consumed per 25-meter length of the elevated section anywhere on the road and its shoulder and sides etc. And at a height/clearance of minimum 5.5 meters from the road level the viaduct superstructure of the width a minimum 8.6 meters and maximum 10 meters for the double tracks would use the airspace of the road. Foundations anyway would use space below road level without hindering the use of the road for people and the road-based vehicles. Due to curves, some of the sections are expected to pass through the existing buildings so as to maintain the ride quality and the alignment parameters therefore these buildings may need to be acquired or rehabilitated or redeveloped or demolished a little for adjustments of free space.

3.2.2 Land Acquisition and R&R Issues

The metro alignment was planned on the existing road and acquisition of land was not involved for viaduct. In case of stations, there could be additional land requirements beyond the right-of-way., to a greater extent, the land required for the construction of the proposed metro lines from AIIMS to Karond Square (Pur Line) and Bhadbhada Square to Ratnagiri Tiraha and depot at Subhas Nagar is mainly government owned land.

The land acquisition and resettlement & rehabilitation activities of the project would be governed by the general principles of The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013, EIB guidelines and the Resettlement Policy Framework (RPF), MP land consent policy and TDR policy.

3.3 Inventory of Affected Properties

There are about 1342 properties likely to be affected out of which 893 are affected in Orange Line and 449 are affected in Blue Line. Out of the total, 496 are residential, 514 are commercial structures, 133 are residential cum commercial, 195 are Community Property Resources (CPRs) and remaining 4 properties are open land. **Table 3.2** below presents the impact of the proposed project on the different types of properties location-wise.

Table 3.3 shows that out of the total 1342 properties, 809 properties are in Government land,

533 properties are in Private land. In Orange Line, 269 properties are in Azad Nagar, 91 are in Saket Nagar and they have been staying in Government land for 40 years. Similarly, in North-South corridor majority of squatters are found in Jahangirabad and Jahangirabad square.

3.3.2 Extent of Impact on Properties – Partially and Fully Affected

Table 3.4 indicates the magnitude of project impact on the properties, which are categorized as Partially Affected Properties and Fully Affected Properties. Any Properties which is going to be affected by 50% or more of its total area is considered as Fully affected. Out of total 1342 properties 124 are Partially Affected and 1218 are Fully Affected. About 858 properties

will be affected fully in Orange Line and whereas, 360 properties will be affected in Blue Line.

3.7 Impact on Historical Monuments

The Taj Mahal Palace and Kamalpati Mahal are two Historical Monuments having Archaeological value in the vicinity of Orange Line and Blue Line, respectively. The Taj Mahal Palace is state protected monument located 550m (approx.) distance from Orange Line, while Kamalpati Mahal is centrally protected monument and is 2km (approx.) away from nearest point of Blue Line. These monuments are located away at acceptable distance from proposed Orange Line and Blue Line alignments. Thus, no impact is anticipated on these historical monuments.

3.8 Overall Impacts

The social assessment indicated that there would be impacts on private properties, loss of livelihood including business loss by owners, loss of rental income by residential and commercial owners, business loss by commercial tenants and squatters.

The affected people would be compensated and assisted as per the provisions of Resettlement Policy Framework (RPF) already finalized by the MPMRCL for the proposed Orange Line and Blue Line of Bhopal Metro Rail Project. The Social Impact Assessment and Resettlement Action Plan (RAP) is prepared based on the detailed Socio-economic assessment of PAPs. Annexure 1 & 2 presents the Census Survey details and details of Tenants pertaining to Orange line and Blue Line respectively. .

3.9 Increase in number of PAHs due to changes made to the Station box lengths

As indicated at section 3.1 in the beginning of this Chapter, with the decision of increasing the Station Box lengths from 96 m to 140 m and modifying/re-orienting the Stations Entry & Exit locations and setting aside certain Entry & Exit provisions as future requirements, there is a change in the PAHs numbers from the numbers with the initial survey undertaken with 96 m of Station Box length. Further, the Depot land and Underground station areas along with the tunnel ramp areas are included in the survey that was undertaken for 140 m station box lengths. these areas are not included for the initial survey that was undertaken for 96 m Station Box lengths

There is an increase in the total number of PAHs with 140 m station box length when compared with 96 m station box lengths and also by including the Depot and UG station areas. The total number of PAHs have increased to 1682 from 973. The difference in number of PAHs Category-wise, with 96 m and 140 m station box lengths are presented in Table 3.15 below.

Table 3.15 Difference in number of PAHs category-wise, with 96 m and 140 m Station Box Lengths

	Total	585	1032	447	388	531	143

There is an increase of 590 PAHs. However, this increase in number of PAHs includes the Depot area and UG Stations along with tunnel ramp areas, which was not included in the survey undertaken for 96 m Station Box lengths.

The Category-wise details of PAHs in Depot and UG station areas are presented in Table 3.16 below:

Table 3.16 Category-wise details of PAHs in Depot and UG Station areas

Thus, with changing the Station Box length from 96 m to 140 m at all the stations, the increase in number of PAHs is 253 (590-337) out of which, 110 PAPs increased in Orange line and 143 in Blue Line.

Though RAP is yet to be approved but as the work has been awarded, RAP implementation for Orange corridor (Priority Corridor) has actually started and the number of PAH's has increased after the final design Management Survey (DMS) i.e., survey undertaken after increasing the Station Box lengths to 140 m and the details are presented in **Table 3.17** below

3.10 Updated Resettlement Impacts based on RAP implementation for Corridor 1

3.10.1 Relocation of Saket Nagar Slum dweller households

Saket Nagar is a slum area located in the Priority Section of the Orange Line alignment. The relocation of the Saket Nagar registered slum area was planned as part of the Slum Free City Plan for Bhopal in 2013. This plan was developed independently before the award of the Priority Section Package in 2018. 90 Households were supposed to be rehabilitated before the construction of the priority section began. However, due to a delay in implementing the Slum Free City Plan, the construction coincided with the relocation process. As a result, MPMRCL requested BMC to prioritize the relocation of 90 households of Saket Nagar under the HFA scheme.

The Priority Section Package was awarded in November 2018. MPMRCL aimed to hand over the sites to the Priority Corridor Contractor as soon as possible to initiate the construction activity.

In Saket Nagar, all the 90 households listed in the survey were already identified under the Pradhan Mantri Awas Yojana (PMYA) scheme by the Bhopal Municipal Corporation (Nagar Nigam). Consequently, MPMRCL collaborated with BMC to relocate the Saket Nagar households under the Housing for All (HFA) Scheme of the State Government, prioritizing their relocation. BMC successfully coordinated the relocation of all the 90 households in Saket Nagar, completing the process by December 2019. This was further corroborated by survey conducted by SIA Sub-Consultant engaged by MPMRCL according to which all the 90 households in the Saket Nagar Slum area were relocated under the PMYA HFA scheme.

3.10.2 Relocation of PAHs at Azad Nagar

With the Construction activity along Priority Corridor having reached Azad Nagar, the Azad Nagar site handed over to the Contractor. In order to prevent causing inconvenience to the residents of the slum area as a result of construction activity reaching very close to the slum area, as well as from a safety standpoint, the relocation of Azad Nagar PAHs have been prioritized.

MPMRCL held consultation meetings with the District Collector, Commissioner of the Bhopal Municipal Corporation, Local MLA, and other local bodies and PAHs. Various meetings with people of the slum area were undertaken. The local MLA wanted to coordinate and supervise the events at their location.

Bhopal District Administration (DA) has carried out the physical survey along with BMC for verification and validation as per the present site condition and requirements considering the initial SIA survey done by the SIA Sub-Consultants engaged by MPMRCL.

As per the SIA Sub-Consultant survey undertaken in 2019, the Number of PAHs at Azad Nagar were 183. However, as per the BMC survey undertaken in 2022, the PAHs have been recorded as 269. There is a gap of three years in the survey. In certain Household members, the Children have attained the age of 18 and some of the Children even got married and are living together in one house. Such Children are recorded as separate Family and the total Family numbers are recorded as 269 by BMC.

Two land parcels were identified for the relocation of Azad Nagar Slum. One location is in Jahangirabad, while the other is in the Jail Bagh neighborhood. Both of these areas are in the vicinity of less than 1 kilometer from the present slum neighborhood. Families in the Azad Nagar Slum region stated their willingness to relocate to these areas because they are

relatively close to their current location and having no negative effects on their current activities.

The allocation of these two regions aims to provide more land/ space to each PAH compared to their previous locations., essentially to give them with better living condition with better infrastructure facilities such as roads, water supply sewerage system, lighting etc.. The Map of the locations is presented below in **Figure-3.1** in the drawing below indicating the new location of Azad Nagar slum dwellers. The yellow colour indicates the new locations where Azad Nagar slum dwellers were resettled. The longitudinal strip (in red colour) shows the earlier location of Azad Nagar slum dwellers.

Figure 3. 2 Google map of relocated sites of Azad Nagar PAHs

The new locations were developed by the BMC and District Administration with proper basic amenities i.e., water, sewerage line, road, electricity, etc.

Allotment of plots to 269 PAHs of Azad Nagar was done through a lottery system for transparency. Monetary compensation, identification, and listing of families were prepared by the District Administration (DA) and MPMRCL as per the approved Entitlement Matrix (EM) of MPMRCL.

Azad Nagar slum dwellers were provided with R & R assistance under the category of Squatters, Since, they do not have any land ownership and were residing on government land.

The newly developed land parcels identified by BMC and District Administration with proper basic amenities i.e., water, sewerage line, road, electricity, etc. were provided to 269 PAHs of Azad Nagar. The details of the same is attached as **Annexure- 3**.

Chapter 4: Socio-Economic Profile

4.1 Profile of Project Affected Families (PAFs)

The socio-economic profile is prepared based on the detailed Socio-economic Survey carried out in conjunction with census of the project affected persons in the project area through structured questionnaires. Through the survey, socio-economic conditions of the AFs, details of the assets affected, their priorities, expectations and apprehensions were collected. The survey captured the entire available project affected persons including those who are likely to lose land and structures including residential, commercial, residential cum commercial, educational and religious were considered. This helped to assess the number of PAFs and extent of impact on each PAH in the corridor of impact.

4.1.1 Demographic and Socio-economic Conditions

Table 4.1 below presents the number of PAFs consulted for Socio-economic survey for both Blue Line and Orange Line. The Socio-economic survey was carried for 1525 PAFs along the project stretch who are available and cooperated at the time of survey. Total population among the surveyed PAFs is 6356. Percentage of Male and Female is 53.2% and 46.8 % respectively. Average household size of the total PAFs is 4; The Gender ratio is 880 per 1000 males. The details are summarized in **Table 4.1**.

4.1.2 Religious and Social Group

Data on religious groups were collected in order to identify people with the specific religious belief among the surveyed families. The religious beliefs and social affiliation of the people are indicators that help understand cultural behavior of the groups. The social and cultural behavior will help understand the desires and preferences of PAPs, which is a prerequisite to rehabilitate the affected people and their families. **Table 4.2** shows that four religions are followed in the study area viz., Hindu, Muslims, Christian and Sikh. The number of families following Christian and Sikh are very negligible in Blue Line. In Blue Line majority of the surveyed families are Hindus whereas in Orange Line majority of the surveyed families are Muslims. The overall study results show that about 62.93 percent are Muslims and 36.85 are Hindus among the surveyed families.

4.1.3 Social Stratification of PAFs

The social stratification holds an important place in the Indian administrative and resettlement and rehabilitation policies and therefore the questions related to the social stratification were provided in the survey questionnaire. **Table 4.3** discloses information about social affiliation of a group. The social affiliation of the group differentiates them for benefits under government schemes. Social groups indicate ranking within the society, preferences and vulnerability. In general, the families belonging to Scheduled Castes (SCs) and Scheduled Tribes (STs) under the provisions of Constitution of India get preferential treatment in the government benefits because the group includes the people who are traditionally vulnerable. Except general category, all other groups need attention and to be addressed for their backward socio-economic conditions. The results of survey conducted both in Blue Line and Orange Line shows that majority of the surveyed families belong to Backward Castes (47.40%) followed by General Caste (42.1%), Scheduled Castes (9.1%) and Scheduled Tribes (1.40%). All the mentioned categories are found in both the corridors. Therefore, a special attention is required to tackle with their issues.

4.1.4 Family Pattern and Family Size

Family Pattern and Family Size indicate the fabrics of sentimental attachment among the family members, social value, economic structures and financial burdens. It is observed from Survey conducted that the majority of surveyed families are nuclear (80.3%) followed by joint (18.4%). The details of family patters are given in **Table 4.4**

4.1.5 Economic Conditions

The economic condition of PAFs describes occupational pattern, family income, employment information and number of earning and dependent members. The occupational pattern includes work in which the head of the project affected families are involved. The family income includes income of all the earning members. The earning members include the people who work and earn to contribute to the family; however, dependents include housewife, children, elderly people and others who cannot work and earn.

The annual income of surveyed people is divided into eight Categories. About 37.1% percent of them constitute the largest group fall under “100000 to 200000” Category, followed by 32.3 % in “50000 to 100000” Category; the complete details about the annual income Categories among surveyed persons is given in **Table 4.5**.

4.1.6 Age Group

The persons of surveyed families further categorized in to six age groups in order to estimate the size of dependent persons. The age wise distribution of persons of surveyed families shows that the highest percent belong to 31-60 age group (39.4%) followed by 16-30 age group (33.6%), 11-15 age group (8.7%), up to 5 age group (5.6%), 6 to 10 age group (7.50%), and above 60 age group (5.2%). It is generally considered that the total number of persons falling in the age-groups between “0 to 15” and “above 60” can be taken as dependents. Age wise distribution of surveyed persons details are given in **Table 4.6**.

4.1.7 Educational Attainment

Education is a tool for vertical mobility in the society. It provides an opportunity to participate in the process of growth and developments. However, it also creates differences among people and introduces a new kind of inequality between those who have it and those who do not. In all the cases, education is a basic need and the best indicator of socio-economic development of a region. The analysis indicates that out of the total surveyed people a small percent i.e., 16.0% are only illiterate, and majority of them are literate. The detailed educational attainment of PAPs is given in **Table 4.7**.

4.1.8 Occupational Pattern

Occupational pattern of the surveyed persons is recorded to assess their skill so that income generating plan can be prepared accordingly for alternative income generating scheme. Secondly, occupational pattern helps in identifying dominating economic activity in the area. The survey results show that majority of surveyed persons fall under the occupation of students (30.1%) followed by homemakers (27.6%). Besides, a large chunk of business holders constitutes 17.1% followed by labourers who constitute 11.9%. However, significant numbers of surveyed persons are unemployed (6.7%). Complete details about the Occupational categories are given in **Table 4.8**.

4.4 Vulnerable Households (VHs) Analysis

The vulnerability of the project affected families has been determined by the people falling in the category of scheduled caste, scheduled tribe, below poverty line (BPL), age above 60 years, women headed family and disabled. If the households fall under BPL as a result of loss of livelihood/assets due to the proposed project, then they shall also be classified as Vulnerable Households (VHs). The study indicates that 830 VHs are identified under Vulnerable category.

Location wise number Vulnerable Households (VHs) is presented in **Table 4.11** below. A total of 830 VHs are identified under the project from both the lines. Out of 830 VHs, majority 219 (50%) of VHs are found in Azad Nagar Slum Areas in Orange line whereas out of 200 VHs majority 48 (37%) are found in Jawahar Chowk in Blue Line.

4.15 Gender Analysis/Issues

- A total of 100 Women Headed Households are going to be affected.
- Most of the women are home makers (40%).
- Out of the 60% of the working WHH, majority (23%) are working as daily wage Labour, 22% are into petty Business, 2% are working in Govt. Service, 1% working in Private Sector, 3% are unemployed and 9% are in other occupations.
- Majority working WHH income is between 50,000 to 1,00,000 per annum.
- There are 24 widows.
- During Consultations with the WHH, the following were the queries raised / inhibitions expressed:
 - Creation of employment opportunities for women who would be losing their livelihood due to project
 - Travelling by public transport is of concern as it is the most uncomfortable modes of travel experienced by women and other vulnerable persons.
 - It takes longer time to visit health facilities in the City.
 - If displaced from the current location, adjusting in the new location and continuing livelihood may take time and there will be loss of income and disturbances in Families.
 - If Houses are provided in the out skirts of the city, travelling to city may take longer time and chances of losing their current livelihood opportunities
 - Children's education and health will be disturbed due to relocation
 - Once displaced no one will take care of their lives.
 - Safety will not be there if relocated from current location
 - Petty shop business will not run smoothly in new locations.

Chapter 5: Stakeholder Consultations and Engagement

5.1 Approach to Stakeholder Identification and Engagement

The key steps involved in stakeholder analysis and engagement are as follows:

- Stakeholder identification – listing of targeted beneficiaries, supporters, opponents, adversely impacted, vulnerable and marginalized groups among beneficiaries, implementing agencies, financing institutions, other Stakeholders having interest and influence
- Assessment of Stakeholder interest and influence – identification of key concerns, expectations, interests, type and extent of influence, possible sources of conflicts, reasons for opposition or resistance of each Stakeholder
- Stakeholder engagement – identification of appropriate mechanisms for engaging Stakeholders in planning, implementation and monitoring through platforms such as meetings, workshops, survey, formation of committees, etc., and clear definition of roles and responsibilities

The approach to identification of Stakeholders and assessment of their interest and influence in key phases of the project is presented in **Table 5.1** below.

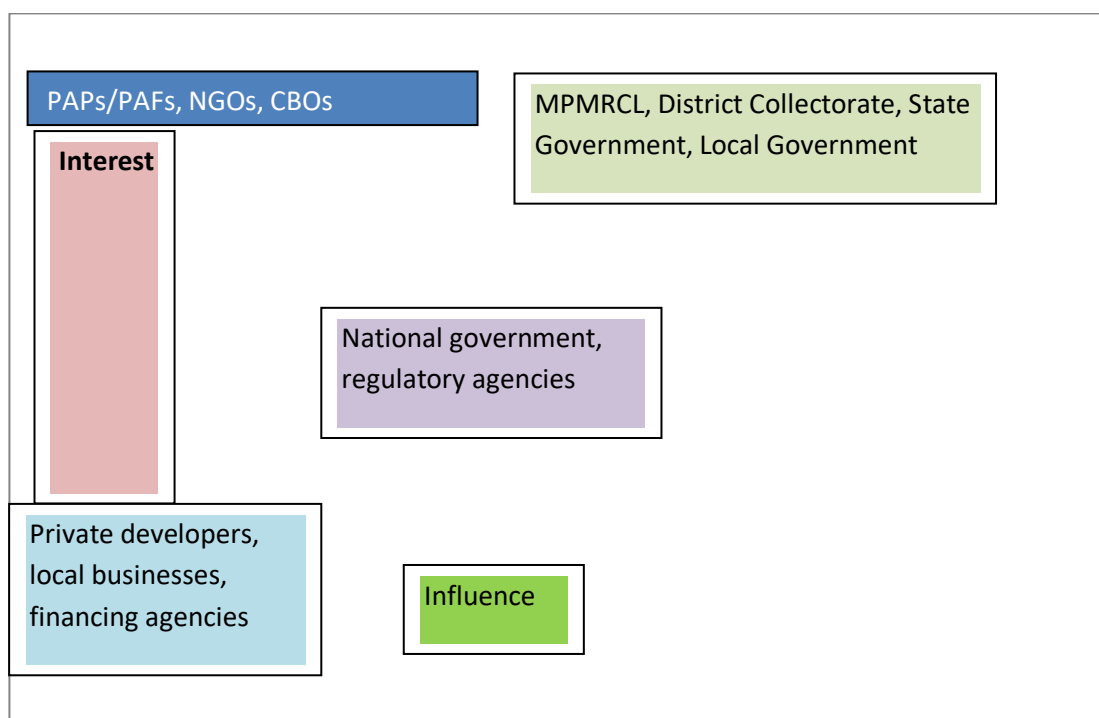

Table 5.1: Approach to identification of Stakeholders and assessment of their interest and influence in key phases of the project

The Stakeholders with high interest and influence as well as Stakeholders with high interest but low influence would be engaged more regularly and intensely in the project through workshops, consultations and other mechanisms as compared to other Stakeholders.

5.2 Need for Public Consultations and Stakeholder Engagement

EIB policies require projects to carry out meaningful public consultation on an ongoing basis. Public consultation would: (i) begin early and carry on throughout the project cycle; (ii) provide timely disclosure of relevant information, understandable and accessible to people; (iii) ensure a free and unintimidated atmosphere without coercion; (iv) ensure gender inclusiveness tailored to the needs of disadvantaged and vulnerable groups; and (v) enable the incorporation of all relevant views of affected people, and Stakeholders into project decision making, mitigation measures, the sharing of development benefits and opportunities, and implementation issues.

Public Consultation and participation is a continuous two way process, involving promoting of public understanding of the processes and mechanisms through which developmental problems and needs are investigated and solved. The Public Consultation, as an integral part of social assessment process throughout the project preparation stage not only minimizes the risks and unwanted political propaganda against the project but also abridges the gap between the Community and the Project Formulators, which leads to timely completion of the project and making the project people friendly.

Public Consultation/information is an integral part of the MPMRCL project cycle. Keeping this in view public consultations with the Project Affected People (PAPs) were conducted as part of Social Impact Assessment. Attention was given to potential vulnerable people like, squatters, encroachers, schedule caste, and Other Backward Section (OBC) of Society were consulted to identify adverse impacts of the project.

5.3 Details of Stakeholder Consultations Organized

The consultation process in the project started early in Orange Line corridor that has issues relating to land acquisition, rehabilitation of affected persons. Consultations with PAPs were held to appraise them on the project benefits, resettlement and rehabilitation measures in the project, identify their concerns and expectations, redressal of grievances etc.

A Public Consultation session was held during June – July 2018 at four locations in the first phase to inform the people about the project, understand their aspiration regarding social impact and resettlement issues associated with project. In addition, informal consultations and focus group discussions were organized as part of the project. In the second phase during the Census survey and Socio-economic survey consultations and FGDs were conducted from 06-06-2019 to 15-7-2019. Similarly, the consultations and FGDs were also conducted during January-February 2022 at the time of final Census survey and Socio-economic survey. The **Table 5.2** below provides details of public consultation meetings, number of participants, and photographs. Sections 7.4 and 7.5 describes ongoing and future engagement and information discloser for effective implementation of the resettlement plan.

5.4 Observations and Perceptions of Participants in Consultations

The project has received acceptability among the local people as it is expected to provide smooth flow of traffic and reduce travel time, reduce fuel consumption and subsequently reduce air emissions. The project would bring positive Socio-economic changes in the area. The perceptions of likely Affected Persons (APs) and other Stakeholders about the project are given below:

- It has been observed that by and large all the Stakeholders involving affected persons and other Stakeholders are aware of the project.
- Local people expressed positive views about the project and felt that the project would provide hassle free movement in the congested part of the city.
- People suggested making alternate arrangement for entry of heavy vehicles to marble market area during construction period.
- They were concerned about closure of existing road and wanted to know how traffic would be managed during the construction stage as they had faced serious problems during the construction of Pool Bogda Railway Bridge.
- The participants did not express concern about noise and air pollution.
- Suggestions were made to control air pollution (dust) during construction by sprinkling of

water.

- Local Stakeholders requested that suitable mitigation measures should be taken to mitigate the adverse impacts during the construction period due to shifting of utilities, movement of heavy equipment and noise pollution etc.
- People were concerned about the loss of land and assets like residential and commercial structures. They were informed that they will be compensated as per replacement cost of land and structures including R & R assistance as per the entitlement matrix.
- During the consultation people were also informed the relocation options that is self-relocation and cash compensation for sifting/transportation of their belongings as per entitlement matrix.
- According to Affected Families who were relocated earlier under different government funded schemes, they have faced problems of drinking water, employment, education facility and connectivity with city etc.
- Participants were concerned for their livelihood; as existing owners are getting Rs. 35000 to Rs. 40000 per month as rent from existing shops. Hence, they suggested that they be provided a plot in Govt. land near Gala Mandi or Govt. should construct a Marble Mandi and allot shops to all affected shopkeepers.
- Residents of Azad Nagar wanted to know about the compensation that they would be eligible and suggested to explore possibility of their relocation in land near Jail Bag Ground (Plot no 920 and 921). Further they also requested for early completion of resettlement and payment of compensation prior to their relocation.

5.5 Ongoing Engagement and Next Steps of Stakeholder Meetings

The R&R program is directly related to the involvement of project affected persons. Continuous consultations with PAPs will help in project implementation. The RISA is entrusted with the task of conducting these consultations throughout resettlement plan implementation, which involves disclosure on entitlement, compensation, assistance options and income restoration measures linking with ongoing government schemes. Sections 7.4 and 7.5 describe the set of activities will be undertaken for effective implementation of the resettlement plan.

RESETTLEMENT ACTION PLAN (RAP)

Chapter 6: Resettlement Policy and Entitlement Matrix

6.1 Applicability of Resettlement Policy Framework (RPF)

The RPF framework is primarily applicable for land acquisition and involuntary displacement of families residing on both public and private lands needed for the project and covers the following categories of affected families:

- Title holder families with loss of land (agricultural/ homestead/ commercial or otherwise)
- Title Holder families with loss of residential structure
- Title Holder family with loss of cattle-shed or petty shop or commercial structure
- Non-Title Holder who is a tenant/leaseholder
- Non-Title Holder who is either residential or commercial squatter or mobile vendor
- Non-Title Holder who is encroacher
- Vulnerable families identified such as Old age persons, women headed, people with disabilities etc.
- Common infrastructure and Common Property Resources
- Unforeseen impact

Though the policy has primary focus on land acquisition and involuntary displacement on a permanent basis, it is applicable to other situations as well, as per the relevant legislations which include the following:

- Land may be acquired on mutual consent
- Land may be acquired for temporary purposes by paying a fair rent or lease amount and the land needs to be restored to its rightful owner after the agreed period as per relevant provisions of applicable acts
- In cases where only part of land is required for acquisition from owners, they may be given the option of requesting for full acquisition and payment of compensation at par with other owners from whom full land is required if such owners find that the remaining land is not suitable for their use and based on verification
- In case the acquired land is not used for the said purpose and is either put for another commercial use or appreciates in value, the benefits may be shared with the owners from whom the land is acquired as per the relevant provisions of applicable acts
- The cut-off date for determining eligibility is the notification date respective to the affected areas for TH and former tenants. For NTH, the cut-off date for determining the eligibility will be the end date of latest survey. In both the cases, the cut-off date has to be considered irrespective of how long PAHs (title holders and non-titleholders) have been present on the land prior to the cut-off date.

6.2 The Acts and Policies Relevant to the Project

6.2.1 Right to Fair Compensation and Transparency in Land Acquisition and Resettlement and Rehabilitation Act, 2013

This RTFCT in LARR, 2013 repeals the Land Acquisition Act, 1984 and is applicable to all States in India. RTFCT in LARR, 2013 is a first National/Central law that addresses land acquisition and rehabilitation and resettlement.

This new Act provides an enhanced framework for providing compensation and resettlement and rehabilitation assistances through a participative and transparent process for land acquisition in the public interest. The Act lays down procedures for estimating fair compensation of the affected families due to land acquisition, rehabilitation and resettlement. Some of the key features include the following: (i) Preliminary Investigations/Preparation of Social Impact Assessment (SIA) and preparation Social Impact Management Plan (SIMP) or Resettlement Action Plan (RAP) (ii) Preliminary Notification stating: project/ public purpose; reasons necessitating land acquisition; summary of SIA; and particulars of the Administrator appointed for the purpose of rehabilitation and resettlement; receipt of Objections and Hearing after the approval of SIA and within 12 months from the date of SIA approval; (iii) Preparation of Rehabilitation and Resettlement Scheme and its declaration by the District Collector after the same is approved by the Commissioner-Rehabilitation and Resettlement. (iv) Public notice and award of compensation and R&R assistances by District Collector within a period of twelve months from the date of the Award publication.

Salient features of the RTFCTLARRA, 2013 are listed below:

- I. The Act provides for land acquisition as well as rehabilitation and resettlement. It replaces the Land Acquisition Act, 1894 and National Rehabilitation and Resettlement Policy, 2007.
- II. The Act provides for the baseline for compensation and has devised a sliding scale which allows States to fix the multiplier (which will determine the final award) depending on distance from urban centers.
- III. The affected communities shall be duly informed and consulted at each stage, including public hearings in the affected areas for social impact assessment, wide dissemination of the details of the survey to be conducted for R&R plan or scheme.
- IV. Compensation in rural areas would be calculated by multiplying market value by up to two and adding assets attached to the land or building and adding a solatium. In urban areas, it would be market value plus assets attached to the land and solatium;
- V. The Collector shall take possession of land only after ensuring that full payment of compensation as well as rehabilitation and resettlement entitlements are paid or tendered to the entitled persons; families will not be displaced from land till their alternative R&R sites are ready for occupation;
- I. The benefits to be offered to the affected families include; financial support to the affected families for construction of cattle sheds, shops, and working sheds; transportation costs;
- II. Rehabilitation and resettlement benefits to which they are entitled in monetary terms along with a one-time entitlement of fifty thousand rupees;
- III. For ensuring transparency, provision has been made for mandatory dissemination of information on displacement, rehabilitation and resettlement, with names of the affected persons and details of the rehabilitation packages. Such information shall be placed in the public domain on the Internet as well as shared with the concerned Gram Sabhas and Panchayats, etc. by the project authorities;
- IV. No income tax shall be levied and no stamp duty shall be charged on any amount that

accrues to an individual as a result of the provisions of the new law. **Annexure 6** gives the Summary of RFCTLARR Act, 2013.

The key provisions of Consent Land Purchase Policy 2014 of MP Government are as follows.

- State Government can acquire private land on consent basis on behalf of various departments or state-owned undertakings
- The Collector is the responsible authority for acquisition
- The land value will be calculated on the basis of prevalent collector guideline rates of lands plus value of available assets on the land including trees, well, house etc. In addition, an equal amount over and above the land will be paid as rehabilitation grant
- Thus, land owner will be paid twice the amount of land value

The national and state agencies are recommended to acquire land for infrastructure projects in Madhya Pradesh in accordance with the provisions of MP Consent Land Purchase Policy 2014. The policy document of Madhya Pradesh Consent Purchase Policy 2014 is provided as **Annexure 7**.

6.2.4 Central Metro Acts

All the Metro Rail Projects are governed by Central Metro Acts in India. On 16th August 2017, the Union Cabinet chaired by Prime Minister Shri Narendra Modi has approved a new

Metro Rail Policy that seeks to enable realization of growing metro rail aspirations of a large number of cities but in a responsible manner. The new policy aims to encourage private investments across a range of metro operations through a PPP route for availing of central assistance for new projects. Private investment and other innovative forms of financing have been made compulsory to meet the huge resource demand for these capital-intensive schemes.

Metro Rail Policy 2017

Most of the metro rail projects have been financed by the central government in partnership with the state governments, while some have been funded by the state governments either on their own or with private partnership. Metro rail projects provide high-capacity public transit and are capital intensive. However, considering the rapid urbanization and the imminent need for enhancing mobility in cities through metro rail, it is imperative to explore alternative and innovative sources of funds to supplement the budgetary resources. At the same time, it is also important to ensure that the proposals are prepared and appraised in a comprehensive manner to enhance urban mobility as well as the speed and quality of implementation of metro projects. It is in this context that the need for a policy on metro rail has been felt necessary to ensure that such systems are decided upon and implemented in the most sustainable manner from the social, economic and environmental perspectives.

The following are the prevalent broad models of financing metro rail in India:

- a. The existing 50:50 Joint Venture model that is predominantly the major model available for the financing and organization structure was started with Delhi Metro Rail Corporation and later followed in other metros like Mumbai Line-3, Chennai, Bangalore, Nagpur, Lucknow, Kochi and Ahmedabad.
- b. The second model is that of full funding by the central government. Examples of this model are the first metro in the city of Calcutta (now Kolkata) by Indian Railways, followed by East-West corridor in Kolkata being implemented on a 74:26 equity sharing between Ministry of Railways and Ministry of Housing and Urban Affairs respectively.
- c. The third model is that of complete funding by state government; examples are Metro rail in Jaipur and Monorail in Mumbai.
- d. The other model is the Public Private Partnership (PPP). Mumbai Metro Line1 and Hyderabad metro rail have been taken up with Viability Gap Funding (VGF) from Government of India. The Rapid Metro in Gurugram is an initiative of Government of Haryana where full funding is by the private concessionaire.

6.2.5 EIB Policies, Deviation from Indian Laws and Proposed Measures for Bridging the Gaps

EIB standard No.6 on involuntary Resettlement has the following objectives:

- Avoid or, at least minimize, project induced resettlement whenever feasible by exploring alternative project designs;
- Avoid and/or prevent forced evictions and provide effective remedy to minimize their negative impacts should prevention fail;
- Ensure that any eviction which may be exceptionally required is carried out lawfully, respects the rights to life, dignity, liberty and security of those affected who must have access to an effective remedy against arbitrary evictions;

- Respect individuals', groups and communities' right to adequate housing and to an adequate standard of living, as well as other rights that may be impacted by resettlement;
- Respect right to property of all affected people and communities and mitigate any adverse impacts arising from their loss of assets or access to assets and/or restrictions of land use, whether temporary or permanent, direct or indirect, partial or in their totality.
- Assist all displaced persons to improve, or at least restore, their former livelihoods and living standards and adequately compensate for incurred losses, regardless of the character of existing land tenure arrangements (including title holders and those without the title) or income earning and subsistence strategies;
- Uphold the right to adequate housing, promoting security of tenure at resettlement sites;
- Ensure that resettlement measures are designed and implemented through the informed and meaningful consultation and participation of the project affected people throughout the resettlement process;
- Give particular attention to vulnerable groups, including women and minorities, who may require special assistance and whose participation should be vigilantly promoted.

There are certain gaps between the prevailing Indian laws and EIB requirements for resettlement and rehabilitation of project affected persons (PAPs). A comparative chart of EIB and Indian laws is given in the **Table 6.1**. If there is any gap between the provisions under Indian Laws and EIB Social Standards then as a project policy the EIB standard will be followed.

6.3 Relocation and Resettlement Options

The main tasks relating to relocation are: identification of Project Displaced Families (PDFs), obtaining their options, development of resettlement sites, allotment of relocation sites, relocation of PAPs (and CPRs), help in construction of houses and the required amenities. All these activities require a coordinated approach between the Project Implementation Unit and the Bhopal Municipal Corporation (BMC). NGOs can play a role in facilitating the process and helping PDFs in their relocation and resettlement.

During preliminary public consultation it was noted that most of the residential and commercial PAFs preferred to resettle near to their previous place of residence and business. Based on the collected data the residential and commercially affected PAFs needed to be identified and rehabilitated properly. The legal Titleholders who are fully affected would be rehabilitated as per the project specific Entitlement Matrix. For the non-titleholders (squatters, kiosks, and encroachers), the project would provide compensation as per the provisions of the Entitlement Matrix.

6.3.1 Resettlement and Rehabilitation Process

The major activities related to the implementation of the resettlement action plan are related to impacts on land, structures, CPRs etc. the RAP implementation will be completed within the implementation schedule. The process of implementation of RAP consists of the following activities:

- Deployment of required staffs (at the site by RISA and project authority);

- Information dissemination activities by holding consultations, awareness generation materials (leaflets, flyers, handbills, etc containing salient features of the project, entitlement matrix, the role of GRC, etc) in the local language.
- Conduct consultations with the local community for rehabilitation and relocation of CPRs.
- Verifying the list of PAPs identified during survey- Verification of affected structure, households, persons to identify the eligibility of PAPs and prepare the final list of affected structures, households, persons. Verification exercise includes actual measurement of the property/ structure loss/damage.
- Confirming the status/category of PAPs (titleholder, encroacher, squatter, kiosk/ mobile vendors, slum dwellers, employees etc.),
- Measurement and valuation of affected structures.,
- Preparation of micro plan and identity card- Micro Plans includes the details of the category of PAF, assets lost, compensation and all types of assistances against the loss/damages of properties/structures, indicating category of entitlement; alternate livelihood options pursued; details of resettlement; land loss details. Additionally, micro plan having the details of skills of the PAFs /PAPs, proposed skill enhancement requirements. Preparation of Identity card of PAPs after the finalization of micro plan which includes the photographs, identification number, category of entitlements, type of losses and entitlements.
- Checking and vetting of the micro plan by the General Consultant.
- Distribution of identity card - The distribution of Identity Cards to the PAPs with signature of RISA and authorized persons of the MPMRCL and the copy of the same is signed by PAPs must be submitted to the MPMRCL.
- Assistance in the disbursement of compensation and R&R assistance to PAPs through District Administrator- RISA assist to MPMRCL for distribution of compensation and assistance to the PAPs before relocation.
- Assist PAPs in the relocation and rehabilitation at resettlement sites: - Assistance in getting fully developed land, coordination with district administration for allocation of house in relocation site.,
- Conduct consultation with the local community for rehabilitation and relocation of CPRs

6.4 Resettlement Options as per the Proposed Entitlement Matrix

Compensation and R&R assistance is paid to 378 PAHs i.e. C.I. Colony, Arjun Nagar and Azad Nagar under the category of Squatters as per Sr. No. 11, of the Entitlement Matrix. Out of 378 PAHs, 87 PAHs of C.I Colony and 22 PAHs of Arjun Nagar were relocated to 1 BHK houses allotted under Pradhan Mantri Awas Yojana (Housing for All Scheme) and these PAHs are relocated in Kokta, Hinotiya, Bajpai Nagar and Bhanpur in Bhopal. However, 269 PAHs of Azad Nagar slum dwellers were allotted developed land parcels with basic amenities (sewer, electricity, water pipeline etc.) through a lottery system by BMC for transparency. R&R assistance were provided under the category of squatters as per entitlement matrix since they do not have any land ownership and were residing on government land. Balance project affected households will also be compensated and assisted as per Entitlement Matrix as outlined in Table 6.2 below.

6.5 Entitlement Matrix

The proposed Metro Rail Project for Bhopal and Indore in the state of Madhya Pradesh has received approval from Govt. of India (GoI) for its implementation under legal framework of

Note 4: Market value of all structures will be calculated without depreciation.

Note 6: Resources accessible to and collectively owned/held/managed by an identifiable community and on which no individual has exclusive property rights are called Common Property Resources (CPR).

6.6 Calculation / Valuation of Assets

The methodology for verifying the replacement cost for each type of loss will be calculated based on the provision made in the RFCTLARR Act -2013, which takes account of market value, additional solatium, applicable interest and therefore, equivalent to the replacement cost defined in the EIB Environmental and social standards 2022.

Land surveys to determine the payment of compensation will be conducted by the competent authority for land acquisition i.e. the Deputy Commissioner on the basis of updated official records and ground facts. The land records containing information like legal title, and classification of land will be updated expeditiously for ensuring adequate cost compensation and allotment of land to the entitled displaced persons. Records as they are on the cut-off date will be taken into consideration while determining the current use of land. The economically unviable residual land remaining after the land acquisition will be acquired as per the provisions of RFCT in LARR Act, 2013.

Valuation of Land: The District Collector/Deputy Commissioner shall determine the market value of the land with assessment of (a) the market value, if any, specified in the Indian Stamp Act, 1899 for the registration of sale deeds or agreements to sell, as the case may be, in the

area, where the land is situated; or (b) the average sale price for similar type of land situated in the nearest village or nearest vicinity area; or (c) consented amount of compensation as agreed upon, whichever is higher.

Where the market value as per above method cannot be determined for the reason that: (a) the land is situated in such area where the transactions in land are restricted by or under any other law for the time being in force in that area; or (b) the registered sale deeds or agreements to sell for similar land are not available for the immediately preceding three years; or (c) the market value has not been specified under the Indian Stamp Act, 1899; the appropriate authority, the State Government concerned shall specify the floor price or minimum price per unit area of the said land based on the Price calculated in the manner specified in the above Para in respect of similar types of land situated in the immediate adjoining areas.

The market value calculated as per above method shall be multiplied by a factor of (a) 1 (one) for both rural and urban area as notified by the State Government Order No. F 16-15(9)-2014-VII-Sec. 2A dated 29.09.2014. Solatium amount equivalent to 100% of the market value calculated on the basis of above.

Valuation of Structure: The cost of buildings will be estimated based on updated Schedule of Rates (SoR) as on date without depreciation. Solatium will be added to the estimated market value of the structure for the titleholders as specified under the provision of RFCTLARR Act-2013. Calculation of compensation for structure will be based on latest guideline value of 2023-24 issued by Government of Madhya Pradesh.

Valuation of Trees and Crops: Compensation for trees and crops will be based on their full replacement cost. The District Collector/ Deputy Commissioner for the purpose of determining the market value of trees and plants attached to the land acquired, will use the services of experienced persons/agencies in the field of agriculture, forestry, horticulture, sericulture, or any other field, as may be considered necessary by him.

Trees standing on the land owned by the government will be disposed of through open auction by the concerned Revenue Department/ Forest Department. However, compensation for trees on government land owned by non-titleholders will be paid to the owners/occupiers.

No income tax will be levied on compensation tax vide section 96 of the RFCTLARR Act, which is also clarified by IT Department through its notification in 2016.

The Executing Agency (EA) for the project will be GoMP through MPMRCL. MPMRCL is wholly owned by GoMP and has been equipped with adequate capacity to implement the project.

MPMRCL has set up a Social Management Unit (SMU) at Headquarter in Bhopal. The roles and responsibilities of SMU are given below;

- Implementation of R&R activities of Bhopal Metro Rail Project;
- Land acquisition and R&R activities in the field;
- Ensure availability of budget for R&R activities;
- Liaison with District Administration for support for land acquisition and implementation of R&R;
- Monitor land acquisition and progress of R&R implementation;
- Develop and implement a Public Consultation program and Communication strategy for disclosure of RAP;
- Liaison with District Administration for Government's income generation and development programs for the PAPs;
- Monitor physical and financial progress on land acquisition and R&R activities;

HQ Level: The overall project is managed by MPMRCL situated at State Head Quarter, Bhopal and headed by Managing Director supported by Director Project (DP). A Social Management Unit (SMU) headed by Additional General Manager (Projects), is working under DP who is in-charge of overall social safeguard management assisted by safeguard team and staff. The HQ level SMU is supervising the overall RAP implementation work with the help of safeguard experts from General Consultant (GC).

PIU Level: A dedicated PIU has been established headed by the Project Director appointed for the Bhopal Metro Project. A Social Management Unit (SMU) headed by Additional General Manager (Projects), is working under DP who is in-charge of overall social safeguard management assisted by safeguard team and staff. At PIU level DGM (Social) and Manager (Social) have been appointed to manage the Project level resettlement activities and coordinate with GC and Resettlement Implementation Support Agency (RISA)

Resettlement Implementation Support Agency (RISA); An experienced Resettlement Implementation Support Agency (RISA) has already engaged under the Project by MPMRCL to assist the implementation of the RP. The RISA plays the role of a facilitator and works as a link between the PIU/MPMRCL and the displaced community. MPMRCL ensures that

adequate resources are allocated to the RISA for effective implementation of R&R activities.

All activities related to the land acquisition and resettlement are planned and implemented as per the implementation schedule to ensure that compensation is paid prior to displacement and commencement of civil works. Public consultation, internal monitoring and grievance redressal is undertaken intermittently throughout the project duration.

7.2 Budget and Financing

Detailed budget estimates for RAP is prepared by the EA and PIU, which is included in the overall project estimate. The budget includes:

- Detailed costs of land acquisition, relocation, livelihood and income restoration and improvement, administration and management and a contingency source of funding;
- Arrangements for approval, and the flow of funds and contingency arrangements.

All land acquisition funds have been provided by the MP State Government. All land acquisition, compensation, relocation and rehabilitation of income and livelihood, consultations and grievance redressal are considered as an integral component of project costs.

The disbursement of money to the displaced persons for land acquisition is being carried out by the District Magistrate / Commissioner's office. The EA has deposited the amount at respective district jurisdictions and the district administration to disburse the money to displaced persons.

Additionally, the assistance and other rehabilitation measures, or any other assistance as stated in the resettlement plan to displaced persons by means of a cheque payment/RTGS into their individual accounts. The RISA is involved in facilitating the disbursement process and rehabilitation program and facilitates opening of bank accounts for the displaced persons who do not have bank accounts.

7.3 Grievance Redressal Mechanism

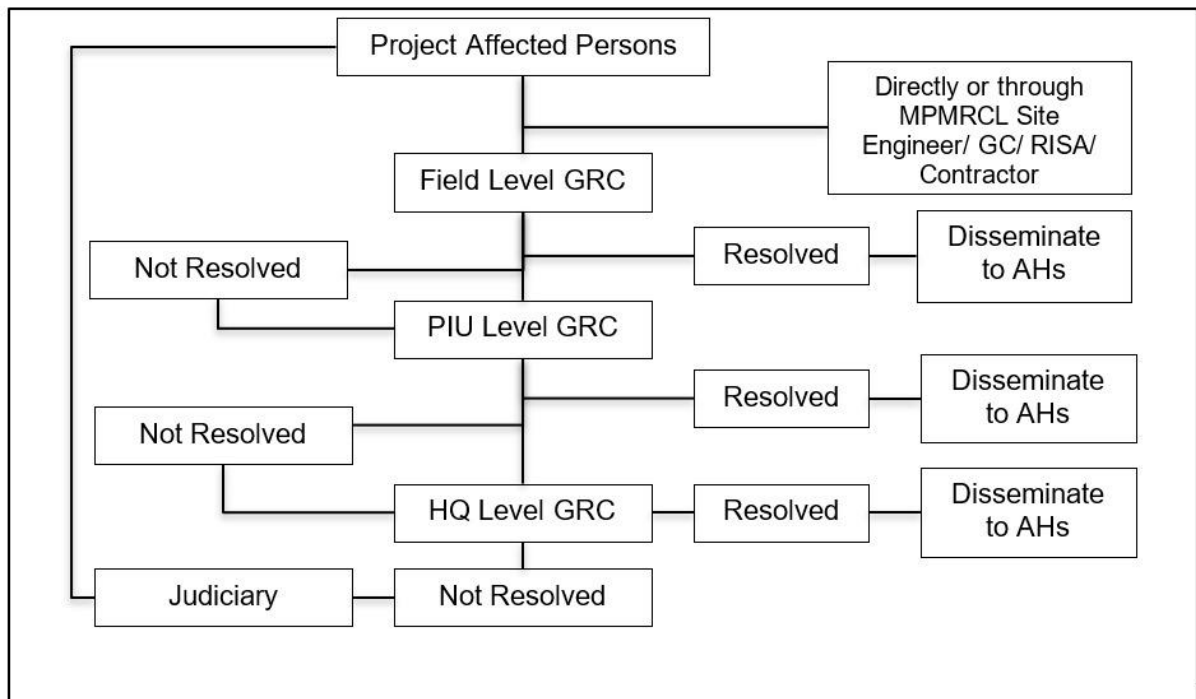

An efficient grievance redress mechanism has been established under the Project to facilitate the PAHs in resolving their queries and complaints. A mechanism for lodging complaints/grievance is practiced during implementation of project. Grievances of PAPs first brought to the attention of Junior Management Level* (JML) - Field Level Officer. If Grievances are not redressed at Field Level, the Field staff will forward the received grievance to Senior Management Level* (SML) Officer for consideration and redressal. Grievances not redressed by SML level Officer will be brought to the Grievance Redressal Committee (GRC) at HQ Level. The composition of the GRC have Higher Management Level* (HML) Officers from MPMRCL and designated Officers from Revenue Department, PWD and Social Welfare Department of Government of MP. The GRC addresses rehabilitation assistance issues both for title holders and non-title holders. Grievances related to ownership rights and land compensation as also R&R can be dealt as per The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013.

The main responsibilities of the GRC are to:

- provide support to PAPs on problems arising from land/property acquisition;
- record PAPs grievances, categorize, and prioritize grievances and resolve them;
- Inform to PAPs on developments regarding their grievances and decisions of the GRC.

The grievances can be registered by person, through a letter addressed to the Chairperson of the GRC. Prior to registering the complaint/ query, a procedural step is in place to assess its eligibility and check that issues raised in the complaint fall within the scope that the GRM is mandated to address. Queries or complaints may be received from the affected party in the form of written complaints. A sample grievance redressal registration form is attached under **Annexure-9** The response time prescribed for the GRCs is two weeks at each level and therefore GRC meeting is called once in a month. Since, the entire resettlement component of the project has to be completed before the construction work starts in the affected portion of the project, the GRC meets at least once in a month to resolve the pending grievances. Other than disputes relating to ownership rights or matter related to the court of law, GRC review grievances involving all resettlement benefits, relocation, payment of compensation and other assistance. RISA assists the affected persons registering the grievances specifically vulnerable PAHs.

A flow chart of grievances redressal is indicated in the Figure 7.1:

Figure 7.1: Stages of Grievance Redressal

7.4 Community Participation during Project Implementation

The effectiveness of the Resettlement Action Plan (RAP) is directly related to the degree of continuing involvement of those affected by the project. Several additional rounds of consultations with PAPs will form part of the project implementation. Consultations during resettlement plan implementation involves agreements on compensation and assistance options and entitlement package. Another round of consultation occurs when compensation and assistance are provided. During public consultations, issues related to land acquisition, compensation, income restoration, employment generation, information flow, grievance redressal, safety, role of administration etc. discussed. The RAP addresses all issues raised during public consultation and recommends institutional strengthening measures as well.

The following set of activities are being undertaken for effective implementation of the plan:

- Project Implementation Unit (PIU) conducts information dissemination sessions in the project area and solicit the help of the local community/ leaders and encourage the participation of the PAP's in RAP implementation.
- Consultation and focus group discussions being conducted with the vulnerable groups like women, families of BPL, Scheduled Castes to ensures that the vulnerable groups understand the process and their needs are specifically taken into consideration.
- The Project Authority will organize public meetings and will appraise the communities about the progress in the implementation of project works and payment and assistance paid to the community. Regular update of the program of resettlement component of the project will be placed for public display at the project offices.
- Taking into consideration the risks of HIV/AIDS during the project construction period and

road safety issues.

- Lastly, participation of PAPs are also being ensured through their involvement in various local committees. PIU and field offices will maintain an ongoing interaction with PAPs to identify problems and undertake remedial measures.

7.5 Information Disclosure

Information disclosure would follow the procedures prescribed by the existing laws and EIB guidelines. All project documents including SIA and RAP are subject to public disclosure, and therefore, would be made available to the public. The SIA and RAP report would be disclosed on EIB website and on MPMRCL website in India as well as at other locations accessible to Stakeholders (to be determined by the MPMRCL). MPMRCL would ensure that meaningful Public Consultations, particularly with Project Affected Persons are undertaken throughout the project cycle. The SIA and RAP would include a Grievance Redressal Mechanism (GRM) so that any concerns rose during construction or operation could be addressed.

The Affected Families/Persons would be well informed about the project and their entitlements. MPMRCL has prepared an information brochure in local language, i.e., Hindi, explaining, the entitlements. The RPF is published in English on the official website of the MPMRCL

The Consultation, Participation and Information Disclosure activities are presented in **Table 7.2**

Chapter 8: Implementation Schedule

8.1 Introduction

The implementation schedule for resettlement plan is scheduled as per the overall project implementation. All activities related to the land acquisition and resettlement are planned to ensure that 100% compensation is paid prior to displacement and commencement of civil works. Public consultation, internal monitoring and grievance redressal are planned to be undertaken throughout the project duration. However, the schedule is subject to modification depending on the progress of the project activities. As part of advance actions, MPMRCL established the GRC, and initiated the resettlement implementation. The R&R activities of project are divided in to three broad categories based on the stages of work and process of implementation. The details of activities involved in these three phases are project preparation phase, RAP implementation phase and Monitoring and Evaluation (M&E) phase.

8.2 Project Preparatory Stage (Pre-implementation Stage)

Setting up relevant institutions for the resettlement activities are the major task during the preparatory stage which is pre-implementation phase. The major activities are performed in this period including establishment of SMU and additionally, the GRC has been established at this stage.

8.3 RAP Implementation Stage

At this stage, Entitlement Matrix has been approved and disclosed to the PAPs. All the arrangements for fixing the compensation and the disbursement are in place which includes payment of all eligible assistance; relocation of PAPs; initiation of economic rehabilitation measures; site preparation for delivering the site to contractors for construction and commencement of the civil work. Internal monitoring is the responsibility of MPMRCL which is started at this stage of the project and will continue till the completion of the implementation of RAP for carrying out the monitoring on half yearly basis.

8.4 RAP Implementation schedule

RAP implementation schedule for R&R activities in the project including various sub tasks and timeline matching with civil work schedule is prepared and presented in **Table 8.1**. However, the sequence may change, or delays may occur due to circumstances beyond the control of the Project and accordingly the time can be adjusted for the implementation of the plan. The implementation schedule can also be structured package wise. The entire stretch can be divided into various contract packages and the completion of RAP implementation for each contract package shall be the pre-condition to start of the civil work at that particular contract package.

Chapter 9: Income Restoration

9.1 Introduction

Development of proposed Bhopal metro rail project may cause an adverse impact on the livelihoods of project affected persons. It would also have negative impact on the socio-cultural systems of affected communities. Restoration of pre-project levels of income is an important part of rehabilitating individuals, households, and socio-economic and cultural systems in project affected areas. The basic objective of income restoration activities is that no project-affected person would be worse off than before the project. To achieve this goal, preparation of Income Restoration programs under RAP is designed in consultation with the affected persons to benefit them.

9.2 Income Restoration Measures

The entitlement matrix of project resettlement plan has adequate provisions for restoration of livelihood of the affected communities. It has the provisions for income restoration of those whose livelihood is getting affected.

9.3 Income Restoration Options Preferred by PAPs

During focus group discussion PAPs were specifically asked about their preference for rehabilitation in case they are affected or displaced by the metro rail project. Majority of PAPs opted for relocation within the area and skill improvement training. Women in some affected areas are currently working in cottage industries. The relocation site should have facilities for women to form similar Mandals (groups) with proper training for earning their livelihoods.

9.4 Institutional Linkages for Income Restoration

During social survey it was observed that majority of the eligible families for income restoration earns their livelihood through petty businesses. Social Management Unit of MPMRCL plays a proactive role to mobilize PAPs to get some vocational skills training for the vulnerable groups and the vendors losing their business and income. The RISA engaged in the implementation of the RAP ensures that the PAPs are facilitated to minimize disruption to their social network and normal work pattern. For Income restoration, it is important that available skills with the PAPs is identified and further upgraded. RISA conducts survey among the PAPs with options of various skills related to the resource base of the area and available market and accordingly select trades for training. Based on the training, RISA identifies income-generating activities for sustainable economic growth opportunities. This includes establishing forward and backward linkages for marketing and credit facility. RISA in consultation with MPMRCL either organize training programs by employing appropriate resource persons or link the PAPs to various ongoing training schemes.

In case of creation of alternative livelihood schemes, felt needs of the target group population was studied and prioritized through people's participation. Further, these options were tested for their viability against availability of skills, resource base of the area and available appropriate technology. Suitable alternative livelihood schemes are being chosen finally,

where training on up-gradation, capital assistance, and linkages being provided for making these pursuits sustainable for the beneficiaries or the target groups. The PAPs are required to participate in developing feasible income generating schemes.. Various poverty alleviation and income generation schemes sponsored by government of Madhya Pradesh and Government of India could be dovetailed by MPMRCL with the help of RISA for income restoration of PAPs.

9.5 Steps in Income Restoration

Basic Information on IR activities of PAPs would be available from the census and socioeconomic surveys.

Based on this information IR activities can be planned. IR activities are of two types:

1. Short term; and
2. Long term: The ensuing section describes both IR schemes.

Short-term IR activities are intended to restore PAP's income in the periods immediately before and after relocation focusing on relocation and subsistence allowances, and providing short term allowances such as:

- a. Subsistence allowance;
- b. Shifting assistance;
- c. Promoting PAP access to project-related employment opportunities such as work under the project construction and maintenance contractors.

MPMRCL would encourage contractors to maximize positive impacts for women participation in the project by providing employment opportunities for women and conducting sensitization initiatives to the communities.

Long-term options are affected by the scale of resettlement which may affect the feasibility of various non-land-based IR options. The long-term options are either project financed or government financed. Therefore, SMU of MPMRCL coordinates with District Administration including tribal development and social welfare departments to assure PAPs access to all existing government schemes that could contribute to income restoration. Project-financed programs would include a specific time frame for handing over the activity to local administrations, at the end of a stipulated period. IR activities would be generated in consultation with the community and officials of district administration.

Keeping in view the resource base of the PAPs and also the socio-economic characteristics and preferences, SMU of MPMRCL and the RISA engaged for the implementation would have to chalk out individual IR schemes in consultation with District Administration. The factors to be considered are:

- Education level of PAPs
- Skill possession
- Likely economic activities in the post displacement period
- Extent of land left
- Extent of land purchased
- Suitability of economic activity to supplement the income

- Market potential and marketing facilities

Training need assessment

For income restoration it is important that available skills with the PAPs is identified and further upgraded. The RISA which is implementing the RAP, conducted an assessment of the training needs. This includes a survey among the PAPs with options of various skills related to the resource base of the area and available replacement (with proper forward and backward linkages) and accordingly select trades for training. In addition, the RISA also conducts a job market analysis to understand employment opportunities in the relocation areas as well as potential barriers and challenges faced by different groups (i.e. women, men, youth, etc.) to determine capacity building and training needs for each group. As mentioned in the GAP, specific actions are undertaken to address the specific training needs of affected women. Based on the training, RISA identifies income-generating activities for sustainable economic growth opportunities. This includes establishing forward and backward linkages for marketing and credit facility. RISA in consultation with the PAPs, SMU, MPMRCL, District Administration and other stakeholders in institutional financing and marketing federations and prepare micro-plans for IR activities.

Business Development Support

Small traders and small businesses receives business development support based on eligibility and which includes the following through the District Administration/BMC:

- Technical assistance in the form of business planning and transitioning
- Access to new markets such as support in identifying markets for new products, or support in adapting products to meet specific specifications to be competitive.
- Implementing agencies may be able to perform the role of a “middle buyer” guaranteeing a market for a specific product or they may provide specific training for families to be able to identify accessible markets for their products in neighboring areas.
- Access to financing including support in establishing connections with available credit facilities, applying for loans, etc.

Employment Support

Support mainly for workers and employees or other vulnerable groups in the form of job placement and job retention support. Job placement includes support in finding employers and securing job positions for all PAFs and for highly impacted and vulnerable PAFs as a priority. Job retention support may take the form of providing support in addressing any issues such as providing training refreshers, assisting in child-care issues, etc.

The best option is to allow the PAPs to continue its former occupation. However, during any development program, occupations are likely to change. The PAPs participated in developing a range of feasible long-term Income Restoration schemes as described above. These are developed during the implementation of the project and financed by the project. In addition, the SMU of MPMRCL work with RISA and liaison with the district administration to dovetail government's poverty alleviation schemes. The micro plans developed by the RISA indicates the type of scheme each has opted. The grants received for economic rehabilitation can be used for purchase of assets. The PAPs would receive training for acquiring new skills or up-gradation of old skills for the activity selected by them.

For petty traders, the potentially available options includes grocery, vegetable, fruit, and pan shops, stationery, cloth, tea and snacks; readymade garments; etc. PAPs are already in the trade and business sector are suitable for these activities. The SMU with the help of District Administration facilitates access to financial institutions to arrange for loans for PAPs.

The options available for skill related schemes and training include tailoring, carpentry, masonry, gold smith, black smith, motor-winding, cycle/motor cycle/auto repair, driving (auto/Matador/etc.), T.V./tape recorders/watch repairing, pottery, leather works, etc. PAPs who are in such trades, can undergo training for skills up gradation to supplement their annual income. Training in skill related activities could be impacted by concerned government agencies. Training could also be imparted through professional and competent outside agency especially hired for the purpose.

Chapter 10: R&R Cost Estimate

10.1 Introduction

This chapter presents a consolidated overview of budget and the cost estimates. The budget is indicative and costs would be updated and adjusted to the inflation rate as the project continues and during implementation. However, the final compensation amount for the land acquisition and structures will be determined by the Competent Authority.

10.2 Cost Estimate for R&R

The total cost for R&R implementation plan is estimated at Rs. 446.87 Crore (Rs 4468.7 million). The complete detailed budget for implementation of Resettlement and Rehabilitation Plan is given in **Table 10.1**.

Chapter 11: Monitoring and Evaluation

11.1 Introduction

Monitoring & Evaluation are critical activities in land acquisition and involuntary resettlement. Monitoring involves periodic checking to ascertain whether activities are progressing as per schedule while evaluation is essentially to assess the performance of PAPs at the end of the project. For this purpose, a monitoring and evaluation (M&E) program is required to be developed to provide feedback to project management which would help keep the programs on schedule and make them successful. Monitoring and Evaluation of R&R gives an opportunity to the implementation and the funding agency to reflect broadly on the success of the basic R&R objectives, strategies and approaches. However, the objective of conducting M&E is to assess the efficiency and efficacy in implementation R&R activities, impact and sustainability, drawing lessons as a guide to future resettlement planning.

Monitoring will give particular attention to the project affected vulnerable groups such as scheduled castes, scheduled tribes, BPL families, women headed households, widows, old aged and the disabled. RAP implementation would be monitored both internally and externally. MPMRCL would be responsible for internal monitoring through their field level officers of Social Management Unit and will prepare quarterly reports on the progress of RAP implementation. An Independent Evaluation Agency may be hired by MPMRCL for mid and end term evaluation of RAP implementation.

11.2 Internal Monitoring

The internal monitoring for RAP implementation would be carried out by MPMRCL. The main objectives of internal monitoring are to:

- Measure and report progress against the RAP schedule;
- Verify that agreed entitlements are delivered in full to affected people;
- Identify any problems, issues or cases of hardship resulting from the resettlement process, and to develop appropriate corrective actions, or where problems are systemic refer them to the management team;
- Monitor the effectiveness of the grievance system
- Periodically measure the satisfaction of Project Affected People.

Internal monitoring will focus on measuring progress against the schedule of actions defined in the RAP. Activities to be undertaken by the MPMRCL will include:

11.3 External Monitoring and Evaluation

An External Consultant will be engaged by MPMRCL to verify its monitoring information

The objectives of the External Monitoring are to:

- Monitor and report on compliance of the Project to the Funding Agency (EIB) Safeguard Provisions;
- Where necessary, recommend corrective measures in relation to the Safeguard Provisions;
- Provide ad hoc advice to the MPMRCL and the EIB as requested on the subject of the Safeguard Provisions; and
- Evaluate whether the social development objectives of the Resettlement Action Plan(s) are actually achieved.

11.3.1 Reporting Requirements

MPMRCL would be responsible for supervision and implementation of the RAP. The External Monitoring Consultant would prepare quarterly reports for the first year, bi-annual reports for the subsequent years and also mid-term and end-term evaluation reports on resettlement activities and submit a copy to EIB. The Independent Evaluation Agency would submit draft and final reports of their assignment to MPMRCL and EIB would determine whether resettlement goals have been achieved, more importantly whether livelihoods and living standards have been restored/enhanced and suggest suitable recommendations for improvement.

11.4 RISA

To implement RAP, the Project Authority MPMRCL will engage the services of Resettlement Implementation Support Agency (RISA) having experience in resettlement and rehabilitation issues through standard bidding process. The implementation agency will work in close co-ordination with MPMRCL. Financial matters related to services of the RAP implementation agency will be dealt by Project Authority. TA detailed Terms of Reference (ToR) for RISA is provided as **Annexure 10**.

Semi-Annual Social Monitoring report is attached as **Annexure -11** to explain the tracking of progress and status.

में उभावित मकान व दुकानों को प्रभावित वियोजना से
बचाने के लिये मेट्रो स्टेशन को चौराह से 200 मीटर
आगे लेजाने से सभी मकान व दुर्गा जी का मंदिर
बच जायेगा और आगे वास्तविक भूमि ही पास में ही
200 मी आगे स्टेशन भी बन जायेगा

उपस्थित लोगों द्वारा यह निर्णय लिया गया की
मेट्रो स्टेशन करोड़ चौराह से 200 मीटर आगे बनाया जावे
तो ठीक रहेगा

1 Introduction

The city of Bhopal, which is situated in the most dynamic & strategic location in the Central India is a hub of IT industries, special economic zones etc and is continually growing. The city is in the need of a world class public transport system, therefore Government of Madhya Pradesh (GoMP) with it's vision 2026, decided to implement a highly efficient and comfortable state of the art urban rail transport system viz., the Bhopal Metro Rail Project.

The DPR of the Bhopal Metro Rail Project was approved by the Govt of India (GoI) in 2016 which was subsequently revised in 2018 view of the new appraisal guidelines issued by the Govt in the September-2017. Subsequently the sanction to the project was accorded in November-2018, which was followed by the formation of 50:50 JV between the GoI and GoMP in August 2019.

2 City Profile - Bhopal

Bhopal Metropolitan district has a population of 2,368,145 persons and Bhopal city has a population of 1778,813 persons as per the census of the year 2011 with an average population density of 6893 persons per Sq.km and maximum population density of 99,176 persons per sq.km as per Bhopal Municipal Corporation. The planning area of Bhopal is 800.26 Sq km for the master plan. It is an active city as it houses State Assembly, administrative headquarters of the Government of Madhya Pradesh, divisional head quarter of Bhopal Division, district headquarters of Bhopal District and City of Bhopal i.e. Municipal Corporation. It is strategically located in the Centre of India and is highly linked by a National rail, road & flight network. The main railway station is a major junction of the country and handles over 200 trains from various parts of the country. The airport also operates some International flights. Bhopal is becoming strategic hub of various economic activities ranging from different manufacturing Industries & Service Industries which are expanding in pace with the growth of the state and country. The city's Public Transport is currently handled by City Buses, Mini buses, Tata Magic, recently started BRTS and three wheeler taxis (auto) further supported by radio taxis and private rent taxi service.

The future growth of population is defined in terms of self-contained sub-cities/ townships in order to regulate the future growth of the city. The proposed sub-cities have been envisaged with nexus to the present transport corridors. The mass transport network would also facilitate provisions to inter link with the overall city road network, integrating the sub-cities through transport network.

3 Land-use Distribution

The Bhopal Development Plan 2005 had projected a total population of 25 lakhs in the planning area. Due to the present gap in rising population and supply of housing, growth of unauthorized settlements can be seen. The details of area allocated for different land uses in the Bhopal Development Plan for 2005 is described in **Table 01**.

Table 01: Land use Composition proposed for Bhopal in BDP 2005

4 Project Corridors

4.1 The Bhopal Metro Rail Project comprises of two corridors and a Depot and the details are as follows:

- Orange Line: The North-South Corridor under construction is from AIIMS to Karond Circle. Start of the Project (Ch: 20.000 km) before AIIMS station (South end) to the end of the Project at Karond Chauraha station (Ch: 36.121 km- North end), the length of Corridor is 16.74 km including Depot ramp of 0.60 km. About 13.35 km of the corridor with 14 (fourteen) stations is elevated and remaining 3.39 km is underground with 2 (two) stations. The Station at Pul Bogda which lies about midway, is planned to be an interchange station with the second corridor which is Red Line.
- Blue Line: The proposed East-West elevated corridor is from Bhadbhada Chauraha to Ratnagiri Tiraha: Start of the Project (Ch: 49.910 km) at Bhadbhada Chauraha Station (West end) to end of Project at Ratnagiri Tiraha (East end- Ch: 62.920 km), the length of Blue Line is 14.21 km including Depot ramp of approx. 1.20 km. A total 14 (fourteen) number of elevated stations have been planned along this corridor including the interchange station with the Blue Line at Pul Bogda.
- A common rolling stock stabling cum maintenance Depot for the two corridors is located at Subhash Nagar.

6.4.6 MPMRCL site visits

RAP implementation was monitored both internally and externally by GC & MPMRCL. The field officers of GC & MPMRCL accompanied RISA Team during Joint verifications intermittently.

Location wise details of Relocation

All PAPs were relocated. The status of shifting /relocation photographs is attached in the **Annexure-03**. Allotment letter & photographs of physical possession taken after relocation is attached at **Annexure-05**.

6.4.7 R&R Cost

The affected people for the Elevated Package 01 Priority Corridor of Orange line were compensated and assisted as per the provisions of Resettlement Policy Framework (RPF) already finalized by the MPMRCL for the proposed Orange Line of Bhopal Metro Rail Project.

1) CI COLONY – 70 + 17= 87 Families + Arjun Nagar 22 Families = 109 Families (total)

1. Amount against Structure –Rs. 20,000/-
2. Transportation allowance -50,000/-
3. Subsistence grant for displaced families for a period of 1 year@Rs.3000/ month=Rs. 36000/-

Compensation paid per family (1+2+3) = 106000.00 per Family

Total Compensation Recipients (109): 109 x 1,06000 = Rs 11,554,000.00

2) Azad Nagar – 269 Families

1. Ex-gratia payment to 269 families paid @ Rs 50000/ per family= Rs 1,34,50,000
2. Provided Land to 240 families =Rs 4,22,40,000

Total Compensation to Recipients (269) = 1,34,50,000 + 4,22,40,000.00 = Rs 5,56,90,000/-

6.5 Impact on Vulnerable Families

All the vulnerable Project Affected families (PAFs) were identified under the project on orange line from AIIMS to Azad Nagar. Location wise number of vulnerable PAFs and relocation of verified PAFs is presented in the **Table 07**. All the PAF which included Women Headed Households, SC and ST; and other vulnerable were facilitated in the relocation process with allowances such as subsistence & transportation. In addition, facilitation for convenient shifting in terms of free trucks were also provided.

6.7 Status of PAFs regularly monitored by MPMRCL

6.7.1 Number of PAFs with type and nature of impact, Details of relocation and Livelihood restoration. Methodology currently followed for monitoring

A total 378 PAFs who were squatters were relocated to different colonies. The main tasks relating to relocation identification of project displaced families was to obtain their option, development of resettlement sites, allotment of relocation sites relocation of PAFs help in construction and the required amenities. Most of the PAFs preferred to resettle near their previous place of residence and business. ALL the Azad Nagar PAF were relocated near to their previous location, whereas squatters of CI colony and Arjun Nagar were moved to Residential colonies of BMC under Housing for All (HFA). All this was coordinated by RISA with the support of different associated stakeholders. RISA conducted regular visits to the relocation site and conducted meeting and consultations with the PAFs to understand and support for any issues related to resettlement. Most of the Project affected families continued with their previous livelihood options and businesses so no Income restoration or livelihood options were required for the PAFs who were currently moved under this Orange Line. **Table 09** provides details about regularly monitored PAFs.

10 Grievance Redressal Status

It would be pertinent here to refer the European Investment Bank (EIB) Standards, which requires proper mechanisms for resolution of disputes that may arise from any aspect of the compensation and development process. The mechanisms should be “affordable and accessible,” and third parties independent of the implementers should be available at the appropriate point in the process. The grievance procedure need to be simple, administered in the first instance at the local level to facilitate access, flexibility and open to various proofs taking into account the need for speedy, just and fair resolution of their grievances.

In the course of RAP/SIA implementation for this project, the MPMRCL facilitated with the help of RISA at field level. The grievance register placed at MPMRCL Office, General Consultant Office and RISA Office for better access and lodging the compliant by PAFs/ PAPs and the summary of received grievance/ complaints in below **Table 14**.

Table 14: Present Status of Grievance Redressal

told that they are not having any grievances against the project and compensation payment, while few grievances demure in nature were settled by RISA and General Consultant in the beginning itself. If required, MD, MPMRCL may finalize the composition of GRC based on the requirement and availability of concerned Officers.
