Environmental and Social Completion Sheet (ESCS)¹

Overview

Project Name:	TACTOTEK (EGF VD)
Project Number:	2020-0716
Country:	Finland
Project Description:	TactoTek is a Finnish company founded in 2011, which develops and commercialises Injection Moulded Structural Electronics ("IMSE") production methods and technologies. The project supports the company's investments in innovation and business growth in automotive, home appliances and other applications.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The investment concerned RDI activities in the company's existing facilities. The outcome of the RDI activities will support environmentally favourable manufacturing processes due to less use of petroleum-derived materials and the elimination of waste during production, notably material scraps as well as toxic wastes from metal plating processes used in traditional electronics manufacturing.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter, site visits by the EIB team and inputs provided by Lenders' Supervisors during Construction that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
