Environmental and Social Completion Sheet (ESCS)¹

Overview

Project Name:	EDUCATION PACA
Project Number:	20170566
Country:	France
Project Description:	Extension des capacités en éducation des lycées de la Région Provence-Alpes-Côte d'Azur.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The Project comprised the renovation, extension and construction of education-related infrastructure in the region of Provence-Alpes-Côte d'Azur (PACA) in France. Following a change in planning, the initial scope of 20 sub-projects was reduced to 9 sub-projects including 4 high-school buildings, 4 education-related sports halls, and the purchase and refurbishment of a building to house the Region's educational services.

Environmental Impact Assessment

The Promoter undertook to disclose any EIA that would be required for any of the components included in the Project. None of the components required an EIA and no disclosures were made to the Bank. The only project component that might have required an EIA was excluded from EIB financing due to implementation delays.

Energy Efficiency

The Promoter's energy performance objectives defined at appraisal were achieved for the components maintained within the scope of the Project. Based on the information provided, the energy savings resulting from the works undertaken within the scope of the Project are estimated at approximately 4.042 MWh/year.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the Promoter, during construction that the Project has been implemented in line with the EIB Environmental and Social Standards, applicable at the time of appraisal.
