Environmental and Social Completion Sheet (ESCS)¹

Overview

Project Name:	BUDAPEST TRAM&TROLLEY ROLLING STOCK
Project Number:	2022-0318
Country:	Hungary
Project Description:	Comprehensive renewal of tram and trolley rolling stock and related infrastructure in Budapest in order to increase service and comfort levels in the City's public transport.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The Project was a major allocation under the Structural Program Loan "COHESION FUND FL IV (HU) (2015-0006)", targeting priority investments under the Transport and the Energy & Environment Operational Programmes and CEF in the EU programming period 2014-2020. The Project was completed in January 2022.

The works were completed when the Bank appraised the Project, and it had been implemented in the period 2014-2022. Adverse environmental impacts due to the Project were minor and temporary and related to the limited interventions inside the footprint of the existing infrastructures.

For the construction activities, the Promoter prepared environmental protection plan, which was implemented during construction. In some relevant cases, a climate protection test was carried out and resulted that the mitigation measures were effective.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
