Environmental and Social Data Sheet

Overview

Project Name:	DISASTER RISK MANAGEMENT (FL 2015-0548)
Project Number:	2024-0498
Country:	Romania
Project Description:	The operation concerns an allocation under the SPL "ROMANIA EU CO-FINANCING FOR ENVIRONMENT 2014-20" (2015-0548) for investments aiming at improving the capacity of the General Inspectorate for Emergency Services (GIES) of Romania to response to forest fires, floods and other emergency situations through the acquisition and delivery of multi-purpose helicopters, fire-fighting trucks, ambulances and other land-based specialised emergency vehicles.

EIA required: no

Project included in Carbon Footprint Exercise¹: no

Environmental and Social Assessment

Environmental Assessment

The project components do not fall under either Annex I or Annex II of the Directive 2014/52/EU amending the Directive 2011/92/EU on the assessment of the effects of certain public and private projects on environment (EIA Directive).

The project has been assessed for Paris alignment and is aligned both against low carbon and resilience goals in line with the Climate Bank Roadmap and the Transport Lending Policy.

The project is considered to contribute 100% to the Bank's Climate Action-Adaptation objective.

The Promoter, the General Inspectorate for Emergency Services (GIES), is large country-wide organisation who has implemented similar fleet modernisation programmes in the past with satisfactory results.

Bilateral agreements concluded at governmental level are in place with neighbouring and other countries in the field of prevention, preparedness and response to disasters. The GIES actively participates at international level in the exercises, projects and actions under the Union Civil Protection Mechanism and in other bodies or regional initiatives that Romania is part of.

Conclusions and Recommendations

For this project, there are no related conditions nor undertakings.

In this context, the project is acceptable in environmental and social terms.

¹ Only projects that meet the scope of the Carbon Footprint Exercise, as defined in the EIB Carbon Footprint Methodologies, are included, provided estimated emissions exceed the methodology thresholds: 20,000 tonnes CO₂e/year absolute (gross) or 20,000 tonnes CO₂e/year relative (net) – both increases and savings.
