## Environmental and Social Completion Sheet (ESCS)<sup>1</sup>

### Overview

Project Name:	Universitätsklinikum Schleswig-Holstein
Project Number:	20120323
Country:	Germany
Project Description:	Rehabilitation and extension of the two sites of the University Hospital Schleswig-Holstein under the investment programme 2013-2018.

### Summary of Environmental and Social Assessment at Completion

#### EIB notes the following key Environmental and Social outcomes at Project Completion.

The Project focused on the infrastructural and organisational development of the two sites of a university hospital located in Lübeck and Kiel in Germany. Following the extension of the existing complex with a new construction on the existing site, the Project included the rehabilitation of various existing buildings or their replacement with new constructions.

The Project enabled the consolidation of services into modernised buildings designed according to the current needs of patients and staff. By incorporating new materials and technologies, the Project increased overall energy efficiency and enabled the Promoter to improve hygiene and safety conditions.

Being a scientific institution, the University Hospital Schleswig Holstein has a strong institutional set-up to constantly improve the environmental performance, and relevant environmental report is published on the promoter's website.

#### Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion, based on reports provided from the Promoter and site visits by the EIB team during construction and after completion, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
