## Environmental and Social Completion Sheet (ESCS)

### Overview

Project Name:	MIDIAGNOSTICS - COVID RAPID PCR (IDFF)
Project Number:	2019-0580
Country:	Belgium
Project Description:	The Project supports the Company's R&D investments and R&D-related capex to advance the development and launch of its molecular diagnostics platform for COVID-19 and other infectious diseases, including readers and cartridges featuring the Company's innovative silicon-based technology.

### Summary of Environmental and Social Assessment at Completion

**EIB notes the following Environmental and Social performance and key outcomes at Project Completion.**

No significant environment or social issues were noted. The Project concerned investments in research and development activities carried out in existing facilities already authorised for that purpose.

Overall, the Project has been assessed as good, having no adverse impact on the environment.

In addition, due to the nature of the activity carried out by the Promoter, the Project has generated positive societal impact considering the technological advances made in the field of medical diagnostics, the potential to support the development of novel biopharmaceuticals and the knowledge externalities generated.

### Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the Promoter and site visit by the EIB team that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
