Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	OPOLE MUNICIPAL INFRASTRUCTURE II
Project Number:	20150620
Country:	Poland
Project Description:	Part financing of small and medium investment schemes in the City of Opole, relating mainly to the road infrastructure, cultural, educational and recreational facilities

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

At appraisal, the Promoter was considered capable of managing the environmental and social issues related to the implementation of the programme and a series of undertakings were put in place. This was necessary due to the mixed composition of the programme which included projects in three different sectors.

Based on the information provided by the Promoter, out of the 23 projects only 2 required Environmental Impact Assessment (EIA):

1. Improving the functioning of the public transport system and implementing solutions that increase road traffic safety within the Opole Wschód railway station
2. Construction of the Piastowska bypass in Opole, section from the northern bypass to Krapkowska Street, Stage II - from the Niemodlińska junction to the northern bypass

The Promoter has provided the relevant environmental documentation and decisions of Competent Authorities. According to information provided by the Promoter, the EIA report, the environmental conditions for implementation and the public consultation process for scheme #1 were contested in December 2016., The relevant authority, General Directorate for Environmental Protection in Poland, issued a final decision in June 2021¹, introducing a few changes for the project implementation and discontinuing the appeal proceedings. The project was completed and accepted into service in January 2022, according to the Promoter. For scheme #2 the Promoter did not report any specific issue regarding environmental or permitting matters.

The Promoter has not reported any other social matters related to the implementation of the investment programme.

Summary opinion of Environmental and Social aspects at completion:

The project was implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal
