Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	EDUCATION INFRASTRUCTURE (HU) II
Project Number:	20190532
Country:	Hungary
Project Description:	The project concerned the upgrading and modernisation of Hungary's basic education infrastructure as well as sport infrastructure used by educational institutions including construction and renovation of schools, classroom extensions and building sport halls and swimming pools.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The Project comprised new construction and rehabilitation of 8 school facilities, 12 classroom extensions and 18 new sport halls as well as construction of 14 swimming pools and 11 larger gymnasiums. According to the promoter, none of the Project components required an EIA.

The Promoter has confirmed that all new buildings meet NZEB requirements.

The original Project scope comprised two Project components with energy efficiency improvement measures which were expected to bring least 3,197 MWh annual savings when compared to the baseline. The final Project scope included only one of these projects, delivering 1,012 MWh annual savings.

No major environmental or social issues occurred during the implementation of the Project.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the Promoter that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
