Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	AGRO-FOOD PROGRAMME MOROCCO
Project Number:	2019-0010
Country:	Kingdom of Morocco
Project Description:	Investment programme including grain storage facilities and chicken broiler farms located in the four main Moroccan consumption regions

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The project has been impacted by the COVID 19 crisis and as such its scope has been significantly reduced compared to the scope considered at appraisal stage and focused only on the expansion of the grain storage infrastructure, the construction and modernisation Day-Old-Chicks farms and the revamping of existing broiler farms.

Despite the reduced project scope, sub-components included in the updated scope have been completed in line with the pre-disbursement conditions established during project appraisal stage. Environmental and Social Impact Assessments (ESIA) have been prepared to the satisfaction of the bank for the greenfield Day-Old-Chicks farms and these have been granted the necessary construction permits.

While the Promoter held relevant ISO 22000 et OHSAS 18001 certifications for their Environmental Health and Safety (EHS) systems at appraisal stage, the EIB could not confirm that the Promoter still held these certifications at the time of completing this document.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
