Environmental and Social Completion Sheet (ESCS)¹

Overview

Project Name:	LYCEES LIMOUSIN
Project Number:	2014-0581
Country:	France
Project Description:	Financement du programme pluriannuel d'investissement dans l'enseignement secondaire et supérieur, la formation professionnelle et la culture de la région Limousin sur la période 2015-2019

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The Promoter confirmed that none of the sub-projects were subject to an EIA due to the characteristics of the infrastructures and their location (restoration, renovation or extension of existing facilities or construction of a new facility in an urban area). The Project sites were situated in most cases on existing school estates and were already within respective city and/or regional plans. The investments financed by this Project were planned, designed and implemented in accordance with the energy and environmental standards set by the Region for construction, which are in line with the standards requested by French law. The investments placed an emphasis on increased resilience towards climate change risks, reducing energy consumption, reducing greenhouse gas emissions, reducing waste and increasing renewable energy generation. The Project supported investments to achieve these objectives whilst at the same time making improvements to the internal learning and working environment for the students and staff alike. No significant environmental or social issues were noted during Project implementation.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the Promoter that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
