Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	<i>COPENHAGEN INFRASTRUCTURE II</i>
Project Number:	20140769
Country:	<i>Global</i>
Project Description:	The operation concerned an investment of 566 MDKK in Copenhagen Infrastructure II K/S with a mandate to invest in renewable energy projects and electricity transmission projects mainly in the EU and other OECD countries.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The Operation concerned the participation of the EIB in Copenhagen Infrastructure II K/S (the "Fund"). The operation has supported environmental benefits by supporting renewable energy projects in the EU, USA and Taiwan, including an offshore wind project in Germany, biomass and offshore wind in the UK, and wind projects the US and Taiwan. These projects have contributed 3,425 MW of renewable energy capacity, generating about 8,885 GWh per year of electricity from renewable energy sources.

The Fund has incorporated EIB's environmental and social requirements into its legal documentation and ESG requirements. As part of the Bank's core requirements, the Fund has appointed an Environmental and Social Manager with the responsibility, among other things, for ensuring proper operation and maintenance of the Environmental and Social Management System.

The Fund has prepared and submitted to the Bank compliance reports and ESG reports on a regular basis. Based on this reporting and regular interaction with the Fund Manager there were no deviations from the EIB requirements or material environmental and social incidents.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
