Environmental and Social Completion Sheet (ESCS)¹

Overview

Project Name:	BROLIS (EGF VD)
Project Number:	2020-0889
Country:	Lithuania
Project Description:	Quasi-equity financing to Brolis, a Lithuanian based company engaged in the development of wearable solutions for monitoring health parameters.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The Project concerned investments in research and development that were carried out in existing facilities in Vilnius, Lithuania, without changing their already authorised scope. The Project was not subject to EIA Directive 2014/52/EU amending Directive 2011/92/EU.

Since 2022, the Promoter has implemented Environment Management requirements under the ISO 14001 standard.

Since 2013, the Promoter has implemented a Management System under the requirements of the ISO 9001 standard.

The research activities undertaken in the Project were aimed to result in new and improved medical devices, specifically in the field of fitness and healthcare parameter monitoring, with a positive impact on healthcare quality. The company's spectrometer technology is also used for dairy farm milk analysis which fosters animal health. Therefore, the Project led to positive social impacts.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the Promoter and a monitoring site visit by the EIB team that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
