Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	Calais Port 2015
Project Number:	20130392
Country:	FRANCE
Project Description:	The project consists of the extension of the Calais Port to accommodate more traffic and to alleviate operational constraints of the current port layout.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The Concessionaire reported that the project was developed according to the requirements defined in the EIA and associated documents and the Bank's Services are not aware of any outstanding environmental issues, incidents or pending claims related with the project.

The Environmental Permits included a recommendation to nominate a Scientific Committee to follow up and monitor the effectiveness of the mitigation and compensation measures defined at the EIA and the related environmental approval. This Committee had already been established at appraisal, was chaired by *La Préfecture du Pas-de-Calais* and included members of several public and private organizations. As per information of the Concessionaire, this Committee maintained its activities during the construction phase as planned.

The Concessionaire also reported that the hydrosedimentary impact of the new infrastructure was in line with the preliminary studies and anticipated coastline stability mechanisms.

Conditions and undertakings

The following environmental and social undertakings were included in the Finance contract:

Environmental undertakings:

- The Promoter shall ensure that an adequate ESMP, defined according to the EIA and corresponding environmental permits and authorisations, is implemented and monitored during the construction of the project, and will notify the Bank of any unexpected environmental impact or incident identified during construction;

In this regard, the Concessionaire reported that no major environmental problems or issues were recorded, and the project was implemented in line with what was defined and planned at appraisal stage.

Bank's involvement

At project origination and preparation, the EIB support's in structuring the operation contributed to a better alignment with policy objectives and targeted inputs (procurement and environment).

Luxembourg, 3rd September 2025

During project implementation and monitoring, the EIB followed up the Promoter's mid-term reporting.

Summary opinion of Environmental and Social aspects at completion:

Reports from the promoter and, where applicable, other sources during the construction phase indicate that the Project was implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
