Environmental and Social Completion Sheet (ESCS)¹

Overview

Project Name:	INNOVATIVE VEHICLE AND AUTONOMOUS DRIVING RDI
Project Number:	2021-0439
Country:	Germany, Poland, France
Project Description:	The project concerns the promoter's investments in R&D activities in the fields of (i) Electronics and ADAS, (ii) Autonomous Mobility Systems technologies.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The project concerned selected activities from the promoter's R&D programme in the field of autonomous driving systems and assisted driving technologies, including the development of autonomous systems for shuttle applications, as well as components and systems targeting a wide range of applications and levels of automation.

Over the project period, the promoter increased its focus on electro mobility activities that are expected to have positive impact in the decarbonisation of the transport sector. The project's outcomes contributed to improve the active safety of vehicles and consequently improve the sustainability of the transport sector. No significant environment or social issues were noted.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
